If the interview is refused, use an interval of X (Where X equals number of households in the EA / number of the sample in the EA) to select a substitute household, counting houses on the right.

When you find a household with someone home, please introduce yourself using the following script. You must learn this introduction so that you can say it exactly as it is written below.

Good day. My name is _____. I am from Sigma International Group, an independent research organization. I do not represent the government or any political party. We are studying the views of citizens in Tunisia about how Tunisia is governed and how the economy is managed. We would like to discuss these issues with a member of your household. Every person in the Tunisia has an equal chance of being included in this study. All information will be kept confidential. Your household has been chosen by chance. We would like to choose an adult from your household. Would you help us pick one?

Note: The person must give his or her informed consent by answering positively. If participation is refused, walk away from the household and record this in the above table on "Reasons for Unsuccessful Calls." Substitute the household using an interval of X (Where X equals number of households in the EA / number of the sample in the EA) households. If consent is secured, proceed to Respondent Selection.

Respondent Selection Procedure

Interviewer: **Within** the household, it is your job to select a random (this means any) individual. This individual becomes the interview Respondent. In addition, you are responsible for alternating interviews between men and women. Circle the correct code below.

Note that "First Interview" should ONLY be used for your very first interview on the first day of fieldwork, NOT your first interview every day.
