STUDY TYPE

Socio-Economic/Monitoring Survey

ABSTRACT

The Recorded Live Births (RLB) dataset provides information on all registered live births in South Africa. The RLB dataset is part of a regular series of cumulative releases that is published by Statistics South Africa (Stats SA) and based on data collected through the civil registration system. RLB 1998-2023 is the latest release in the series, which replaces and includes the data of the previous release (i.e. RLB 1998-2023 includes the data from RLB 1998-2022). The main objective of this dataset is to outline emerging trends and differentials in birth occurrence and registration, by selected socio-demographic and geographic characteristics, in South Africa over time. Reliable birth statistics are necessary for population health assessment, health policy, service planning and programme evaluation. These data are particularly critical for planning, implementing and monitoring development policies and programmes such as the National Development Plan (NDP) in South Africa, Agenda 2063 at regional level and the Sustainable Development Goals (SDGs) at international level.

Version

VERSION DESCRIPTION

v1: Edited, anonymised dataset for public distribution

VERSION DATE

2024

VERSION NOTES

Version 1 was downloaded by DataFirst from the Statistics South Africa website on 16 September 2024

Scope

NOTES

This dataset contains statistics on births that occurred in South Africa over the period 1998-2023 and were registered by the Department of Home Affairs (DHA). The dataset includes other socio-demographic and geographic characteristics including age of mother and father, sex of child and province of birth.

Coverage

GEOGRAPHIC COVERAGE

This dataset has national coverage.

GEOGRAPHIC UNIT

The lowest level of geographic aggregation covered by the data is magisterial district using the 2016 municipal demarcations.

UNIVERSE

This dataset is based on information on birth occurrences from the South African civil registration system. It covers all birth notification forms from the Department of Home Affairs (DHA) for births that occurred from 1998-2023 and that were registered between January 2023 and February 2024. The dataset excludes all births that occurred in South Africa but where the parents were non-South African citizens or not permanent residents.

DATA COLLECTION MODE

Other

DATA COLLECTION NOTES

The registration of births is governed by the Births and Deaths Registration Act, 1992 (Act No. 51 of 1992 as amended), and is administered by the Department of Home Affairs. After a birth is registered, the Department of Home Affairs issues a birth certificate and, where applicable, updates the population register. The forms are then collected by Statistics South Africa (Stats SA) for processing.

DATA COLLECTORS

Name	Abbreviation	Affiliation
Department of Home Affairs	DHA	Government of South Africa

Questionnaires

QUESTIONNAIRES

The form used to record live births is the Notice of Birth form of the Department of Home Affairs (Form DHA-24). Previously there were three forms used:

- Form BI-24 (for births registered within the first year)
- Form BI-24/1 (for births registered between a year and 14 years)
- Form BI-24/15 (for births registered after 15 years or more)

Data Appraisal

DATA APPRAISAL

The Statistics South Africa metadata document mentions two birth forms, however this seems incorrect. There is only one form used, the DHA-24.
