TITLE

Domestic Electrical Load Survey Secure Data 1994-2014

COUNTRY

Name	Country code
South Africa	ZAF

STUDY TYPE

Household Survey [hh]

ABSTRACT

This dataset contains sensitive data that has not been disclosed in the online version of the Domestic Electrical Load Survey (DELS) 1994-2014 dataset. In contrast to the DELS dataset, the DELS Secure Data contains partially anonymised survey responses with only the names of respondents and home owners removed. The DELSS contains street and postal addresses, as well as GPS level location data for households from 2000 onwards. The GPS data is obtained through an auxiliary dataset, the Site Reference database. Like the DELS, the DELSS dataset has been retrieved and anonymised from the original SQL database with the python package delretrieve.

KIND OF DATA

Sample survey data

UNIT OF ANALYSIS

Households and individuals

Version

VERSION DESCRIPTION

v1: Edited, partially anonymised data for use in DataFirst's secure research data centre

<https://www.datafirst.uct.ac.za/services/secure-data-services>

VERSION DATE

2019-05-13

VERSION NOTES

Version 1

Scope

NOTES

The scope of the South African Domestic Electrical Load Survey Secure Data includes:

HOUSEHOLD: Household characteristics, occupant demographics of gender and age, education, employment, income,

income sources, number of household occupants with income, dwelling ownership, gender of head of household,

DWELLING: Dwelling characteristics, wall material, roof material, floor area, ceiling, insulation, rooms, water source, out-buildings, circuit breaker, business use

APPLIANCES: Appliance characteristics, stove, hotplate, kettle, heater, iron, geyser, washing machine, TV, HiFi radio, lights, fridge, freezer, microwave, tumble dryer, broken appliances, appliance usage

BEHAVIOUR: Cooking, heating, alternative fuels, paraffin, gas, wood, charcoal, coal,

ELECTRICITY: Time electrified, power quality, lights dimming, power outages, power trips

KEYWORDS

appliance

Coverage

GEOGRAPHIC COVERAGE

The study had national coverage.

GEOGRAPHIC UNIT

The lowest unit of geographic aggregation in the secure (restricted-access) version of the data is street address, and household GPS coordinates from 2000 onwards.

UNIVERSE

The survey covers electrified households that received electricity either directly from Eskom or from their local municipality. Particular attention was devoted to rural and low income households, as well as surveying households electrified over a range of years, thus having had access to electricity from recent times to several decades.

Producers and sponsors

PRIMARY INVESTIGATORS

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

See notes on data collection for DELS 1994-2014.

Data Processing

DATA EDITING

This dataset has been produced by extracting only the survey responses from the original NRS Load Research SQL database using the saveAnswers function from the delretrieve python package (<https://github.com/wiebket/delretrieve>: release v1.0). Full instructions on how to use delretrieve to extract data are in the README file contained in the package.

PARTIAL DE-IDENTIFICATION

Partial de-identification was done in the process of extracting the data from the SQL database with the delretrieve package. Only the names of respondents and home owners have been removed from the survey responses by replacing responses with an 'a' in the dataset. Documents with full details of the variables that have been anonymised are included as external resources.

MISSING VALUES

Other than partial de-identification no post-processing was done and all database records, including missing values, are stored exactly as retrieved.

Data Appraisal

DATA APPRAISAL
