

Dear User

Thank you for using the Labour Force Survey (LFS) data.

Overview

The LFS is a twice-yearly rotating panel household survey, specifically designed to measure the dynamics of employment and unemployment in the country. It also provides insight into a variety of issues related to the labour market, including unemployment rates, according to standard definitions of the International Labour Organisation (ILO).

Contents of CD-Rom

This CD-Rom contains Labour Force Survey data from September 2000 to March 2005.

The LFS results prior to March 2004 were weighted on the basis of Census 1996 information. After the release of the 2001 Census it was imperative that all these LFS datasets be re-weighted to the most recent census results to allow for better comparisons.

The CD-Rom contains the following series:

- LFS 2 - September 2000
- LFS 3 – February / March 2001
- LFS 4 - September 2001
- LFS 5 - February / March 2002
- LFS 6 - September 2002
- LFS 7 - March 2003
- LFS 8 - September 2003
- LFS 9 - March 2004
- LFS 10 - September 2004
- LFS 11 - March 2005
