Dear User

Thank you for using the Labour Force Survey (LFS) data.

Overview

The LFS is a twice-yearly rotating panel household survey, specifically designed to measure the dynamics of employment and unemployment in the country. It also provides insight into a variety of issues related to the labour market, including unemployment rates, according to standard definitions of the International Labour Organisation (ILO).

Contents of CD-Rom

The LFS results prior to March 2004 were weighted on the basis of Census 1996 information. After the release of the 2001 Census it was imperative that all these LFS datasets be re-weighted to the most recent census results to allow for better comparisons.

The CD-Rom contains the following series:

LFS 2 - September 2000
LFS 3 – February / March 2001
LFS 4 - September 2001
LFS 5 - February / March 2002
LFS 6 - September 2002
LFS 7 - March 2003
LFS 8 - September 2003
LFS 9 - March 2004
LFS 10 - September 2004
LFS 11 - March 2005

COPYRIGHT NOTICE AND DISCLAIMER
