

Survey Technical Information

The Quality of Democracy and Governance in Nigeria

Afrobarometer Round 4, 2008

Dates of Fieldwork:	13 to 25 May 2008
Sample size:	2324
Sampling frame:	The sample was drawn from the National Integrated Survey of Households (NISH) provided by the Federal Office of Statistics, incorporating updated (2005) population estimates based on data from the United Nations Development Program (UNDP), the World Bank, and the Ministry of the Federal Capital Territory (FCT). The NISH list is a random sample (approximately 6000) of the full census frame of all EAs (110K) from the 1991 census by the National Population Commission. (Full results of the 2006 census in Nigeria have not yet been released.)
Sample universe:	Citizens age 18 years or older, excluding institutions
Sample design:	Nationally representative, random, clustered, stratified, multistage area probability sample
Stratification:	Zone and large urban/small urban/rural
Stages:	PSUs, start points, households and respondents
PSU selection:	Probability proportionate to population size (PPPS)
Cluster size:	8 households per PSU
Household selection:	Randomly selected start points, followed by walk pattern using 5/10 interval.
Respondent selection:	Gender quota filled by alternating interviews between men and women; respondents of appropriate gender were listed, after which a household member draws a numbered card to select an individual.
Weighting:	Weighted to account for individual selection probabilities and correct for oversamples in South-South zone
Margin of error:	+/- 2% with 95% confidence level
Fieldwork by:	Practical Sampling International (PSI), Nigeria.
Survey Languages: (Official translations)	Yoruba, Igbo, Hausa and Pidgin English
Main researchers:	Taofeeq Akinremi, Gbenga Adewumi, Olaniyan Olusegun, Moses Olusola, Idris Liasu, Ajiga Segun, Innocent Chukwuma, Shola Omotosho
Outcome rates:	Contact rate: 0.927 Cooperation rate: 0.774 Refusal rate: 0.102 Response rate: 0.718
