This CD-ROM is the first version 04/00, produced during the month of April 2000, from the Living Conditions Monitoring Survey (LCMSII) of 1998.

At the request and recommendations of data users, CSO has decided to put together this CD-ROM.

Since the content of this CD-ROM could be updated, CSO recommends to all users to ensure that they have the latest version of the CD-ROM before starting analysing the data.

For the benefit of all potential users of this data, it is required that all users send observations and recommendations concerning the data, as well as the result of its analysis, to CSO directly. CSO will appreciate very much feedback from users of the data.
