Marriages and divorces, 2010

The data for marriages and divorces are in two separate files. The files are flat, ASCII, fixed format, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programmes as possible, and thus accessible to a wide range of people.

Other important information can be found in the following:
- Record layouts
  - civil marriages
  - customary marriages
  - civil unions
  - divorces
- Divorce Form (Form 07-04)
- Marriages and divorces 2010 statistical release (P0307)
- Marriages and divorces 2010 CD on Stats SA’s website: www.statssa.gov.za

The data files

Each file contains the following information for each variable:

Description of variables

Descriptive name: This is a short description of the variable with the variable name in brackets.

Position of the variable: The position of a variable within a record is recorded in the format (@xxx y.). "@xxx" indicates that the variable starts at position (i.e. column) xxx, and "y" indicates the length of the field. All variables are numeric and right justified.

Final code list: The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

Missing value: The code for "missing"/"unspecified" values is given for each variable.

Note to users: Additional information for further clarity on questions.
Legislations covering registration of marriages, civil unions and divorces

Statistics South Africa (Stats SA) publishes marriage data on citizens and permanent residents that are collected through the national civil registration systems. Data in Statistics South Africa’s Marriages and divorces, statistical release P0307 are based only on registered marriages and divorces that are stipulated and governed by the country’s legal frameworks. The management of registered marriages is the responsibility of the Department of Home Affairs (DHA). Two main legislations cover the registration of civil marriages and customary marriages. Civil marriages are administered through the Marriage Act, 1961 (Act No. 25 of 1961) as amended, and its associated regulations. Customary marriages are governed by the Recognition of Customary Marriages Act, 1998 (Act No. 120 of 1998) that came into effect on 15 November 2000. An additional legislation is the registration of civil unions that is covered by the Civil Union Act, 2006 (Act No. 17 of 2006) that came into operation on 30 November 2006. The dissolution of registered marriages and civil unions falls under the jurisdiction of the Department of Justice and Constitutional Development (DoJ&CD). This responsibility of the department is mandated through the Divorce Act, 1979 as amended, and its associated regulations. (Act No.70 of 1979) and the Jurisdiction of Regional Courts Amendment Act, 2008 (Act No. 31 of 2008) as amended which came into effect on 9 August 2010. In addition to the above legislations, The Statistics Act (Act No. 6 of 1999) prohibits the disclosure of information regarding individuals to any person concerned or the person’s lawful representative thus providing confidentiality to the marriages, civil union and the divorces data.

Methodology for civil marriages, customary marriages and civil unions

After the solemnisation ceremony of a marriage or a civil union, the marriage officer submits the marriage /civil union register to the nearest office of the DHA, where the marriage / civil union details are recorded in the National Population Register (NPR). With respect to customary marriages, the two spouses and their witnesses present themselves at a DHA office in order to register a customary marriage. Hence, the province of registration is not necessarily the province of the place of usual residence of the couple since the registration of the marriage can take place in any DHA office.

The target population is all civil marriages, customary marriages and civil unions recorded in the National Population Register in 2010 by the Department of Home Affairs.

Statistics South Africa requests electronic data on marriages and civil unions from DHA through the State Information Technology Agency (SITA). Data on civil marriages, customary marriages and civil unions are received as three separate ASCII files. The three data sets are processed and analysed separately. The results are also published separately under the Marriage section of the Marriages and divorces release.

**DATA FILE: DIVORCES**

**Methodology**
The divorce data are based on successful applications for divorce that have been issued with decrees. The data are collected from the courts that deal with divorce matters using a standard structured form prepared by Stats SA in collaboration with the DoJ&CD. Once a decree of divorce is issued, the plaintiff completes the form and the registrar of the courts signs and stamps it. The forms are consolidated and regularly mailed to Stats SA’s head office. At Stats SA the forms are sorted and captured according to the court name and calendar month. Similarly, the forms are stored in boxes according to the court name and calendar month. A quality assurance of the captured data is done. The data are analysed and published under the divorce section of release.

The target population is all divorce applications that were completed in 2010, *i.e.* that were finalised and issued with decrees of divorce in 2010 by DoJCD.
