## CONSENT FORM: Young Adult Module

In 2002 [or the beginning of 2003] you generously agreed to be a part of the Cape Area Panel Study. The Cape Area Panel Study is a study of young adults' schooling, health and well-being in South Africa. It is run by researchers at the University of Cape Town together with colleagues at the University of Michigan in the United States. The purpose of this study is to learn more about the challenges and opportunities facing young people as they make the transition to adulthood. A panel study is one in which we re-interview the participants as they grow older. We may have re-interviewed you already, in either 2003 or 2004.

We would like to re-interview you. The questionnaire again asks about schooling, work, living arrangements, parenthood and relationships, and sexual behaviour. It is our expectation that the results from this study will improve our understanding of the health, education, and work experience of young people in South Africa today.

We want to make sure that you understand the following information about the study.

- Your participation is entirely voluntary. You may refuse to take part in the interview, and may stop at any time if you do not want to continue. You may also skip any particular question or questions if you do not wish to answer them.
- We expect that the interview will take approximately 45 minutes.
- All information collected for this study will be kept strictly confidential. Individual responses to our questions will never be made public, and no information which could identify you or your household will ever be released.
- You have the right to ask questions at any point before the interview, during the interview, or after the interview is completed.
- We will want to re-interview you again in 2006 or 2007. But we will ask for permission again at that time. Agreeing to participate now does not mean you have to participate the next time around.

By signing below, you signify that you agree to continue to be a participant in the Cape Area Panel Study.

## Residential and Schooling History

In the previous interviews for CAPS, respondents like you gave us important information about where you have lived, where you went to school, and (in some cases) where you studied after leaving school. Can we begin by checking the information that you gave us before? If the information below (and opposite) is incomplete or incorrect, please give us the correct information. For each year beginning with the year that you turned age 14, please tell us where you lived for most of the year (on this page). On the next page please tell us what school or educational institution you attended for most of the year beginning at the age when you started school.

**What is the respondent's year of birth? (on cover-page A.21.3). Check that there is a zero in B6 for this year.**

		Changes have not happened yet	95
		No response / refused	98
		Don't know	99

**Interviewer read out:** Now I am going to ask you some questions about having sex. We asked you some questions about this in 2002 or 2003. Now we are trying to find out how the lives of people like you have changed as you have grown older. We hope that we can learn how to make the lives of young people safer and happier. We know that some young people have sex; some people have several sexual partners, while others do not have sex at all. Please, try to answer the following questions honestly.

Remember that your answers are strictly confidential. The University of Cape Town imposes strict rules on fieldworkers. Before we record the data on a computer, we detach all record of your name and address.

**Relationships Involving Sex (pages 30 and 31)**

These two pages can be completed by the respondent him/herself. On these two pages, write 98 if respondent refuses to answer the question and 99 if the respondent does not know the answer.

E.23a	Was this module completed by the fieldworker?	Yes	1
		No	2

We now have some questions about the relationships that you have had that involved sex. Surveys often ask about when young people first had sex, and how many partners they have had, but other surveys have not asked about the *kinds of relationships* in which young people have sex. We do not want to know the names of the people with whom you have had sex, but we will complete the questions more quickly if we can write down the initials (e.g. "J" or "J.M.") or nickname or first name of each sexual partner, starting with the first person with whom you had sex.

We will not record the information on names or initials of partners in our computers.

**Instructions (continued)**

We need to know about all of your sexual partners, including people with whom you had sex many times and people with whom you had sex once only. If you would like to complete this section yourself, you can, and we can seal it so that I do not see what you have written. If you do not understand a question, I can help you. **If the respondent wants to complete the form him- or herself, give him/her the questionnaire. When the respondent has completed the form, ask if it is completed, then thank him/her and seal it with a sticker. If the respondent does not choose to fill in the questionnaire him/herself, ask:** Starting with your first sexual partner, what was his/her initial(s), nickname or name?  
 If the respondent has had more than ten sexual partners in his/her life, then we ask only about the ten most recent.

## Your children

E.35a w3y_pregever	Have you ever been pregnant or made someone pregnant?	Yes	1	<b>Read instructions below and then go to E.35</b>
		No	2	

In previous interviews, the participants in CAPS told us about any children they had had. If you told us about any children of yours, we will have recorded some of the information here. If you do not want me to read out this information, please tell me. **If the respondent prefers that you do not read out the information, show them the pre-edited information or proceed as if there was no information. Do not show the pre-edited information to anyone other than the young adult.** We are interested in any children that have been born since then. We are also interested in any pregnancies – or pregnancies that you caused – that did not result in the birth of a child. On this table, please correct and bring up to date any information about your child(ren), as well as pregnancies that did not result in a live birth.

**If a pregnancy resulted in the birth of twins, record details of the second twin in the last column, specifying from which pregnancy the twin was born. The last column can also be used for a seventh pregnancy, if necessary. Make a note in the margin explaining any unusual responses.**

## Module K. Contact Information

	<p><b>INTERVIEWER READ OUT:</b> Thank you for participating in this research survey. We will try to contact you again in a year or two to learn more about how life changes for South African young people. Last time you gave us these names and addresses of people who we would know where you are, or how to reach you, in the future.</p> <p>Again, all information you provide is kept confidential. No one outside of the research team will have access to this information, and the information will only be used for research purposes. No identifying information will be used in printed reports</p> <p><b>Interviewer:</b> Show respondent the prepared page. If any details have changed (for example the contact has a new address or telephone number) or the respondent suggests a completely new contact, please correct on the right hand side.</p>

>	<p><b>INTERVIEWER READ OUT:</b> Thank you very much for your time. All of the information you have given me has been very helpful. As part of our quality control system, a supervisor from the University of Cape Town may visit or call you to check that this interview did take place. They will also ask you a few questions, some will be the same as what I have asked. This is nothing to be worried about. They are simply making sure I have done my job correctly.</p>
