## Overview

---

**ABSTRACT**

The Income and Expenditure Survey is conducted every five years in South Africa. The main purpose of the survey is to determine the average expenditure patterns of households in different areas of the country. This survey forms the basis for the determination of the "basket" of consumer goods and services used for the calculation of the Consumer Price Index. The IES is based on the sample for the rotating panel of the twice yearly Labour force Survey (LFS). The IES 2000 was conducted in October 2000.

**KIND OF DATA**

Sample survey data [ssd]

**UNITS OF ANALYSIS**

The units of analysis in the survey are households and individuals

## Scope

---

**NOTES**

The survey measures the detailed income and expenditure of households in South Africa

### Data Collection Notes

---

Data was collected by means of an interview with the household head or a responsible adult and the questionnaire was completed by the enumerator during this interview. In cases where the household requested to complete the questionnaire themselves, it was dropped off by the enumerator, and the completed questionnaire was collected at a second visit.
