STUDY DESCRIPTION

SADA 0039

Title: Omnibus February 1996.

Principal Investigator/s: Human Sciences Research Council (HSRC)

Depositor: Human Sciences Research Council (HSRC)

Abstract:

An omnibus survey is done quarterly and its purpose is to give clients an opportunity to participate in a national survey at low cost. A number of clients' questions are combined into one questionnaire. This questionnaire is usually administered to probability sample of about 2200 respondents in the whole country (South Africa). The 1996 February omnibus consisted of two separate samples of 2200 each – one sample having a yellow questionnaire and the other sample having a pink questionnaire. The February/March 1996 omnibus survey was undertaken over the period 27 February to 24 March 1995. The data from this survey was available in May 1996. The fieldwork was done on a countrywide basis including all nine provinces. Interviewers specifically trained in personal interviewing collected the data. The respondents were scientifically selected, and interviewed at home. The interviews were conducted after hours to ensure that the scientifically drawn person was present. If the drawn person was not home during the first visit, but was available during the fieldwork period, an appointment was made and the person concerned revisited. If nobody in the household qualified, or was available during the fieldwork period, the household was substituted. The questions in the questionnaire were printed in both English and Afrikaans. During training these were translated into the relevant languages of the black fieldwork areas. Interviews were conducted in the respondent's choice of language.

The respondent also had to be part of the scientifically drawn household, and be available during the fieldwork period. Substitution of the visiting point was only allowed for specified reasons.

OMNIBUS SURVEY

The Human Sciences Research Council (HSRC) regularly undertakes studies on a whole range of social matters amongst all population groups, for example research on family planning, education, unemployment, the problems of the aged, and intergroup relations.

This questionnaire covers a variety of subjects which are presently being investigated to obtain additional information. Apart from biographical data, subjects being covered are:

1. Truth Commission
2. Political aspects
3. Economics
4. SAPS
5. Non SA Citizens
6. Election
7. Image of the Government
8. Local Government
9. Cancer

To obtain reliable, scientific information it is necessary that you answer the questions as honestly as you can. Your opinion is important in this research.

The area in which you live, as well as yourself have been selected randomly for the purpose of this survey, thus the fact that you have been chosen is quite coincidental. Your name will not be written anywhere on the questionnaire and you need not sign the questionnaire or any other documents. The information that you provide will be treated as confidential. It will be processed by computer in such a way that no personal identification will be possible.

OMNIBUS SURVEY

The Human Sciences Research Council (HSRC) regularly undertakes studies on a whole range of social matters amongst all population groups, for example research on family planning, education, unemployment, the problems of the aged, and intergroup relations.

This questionnaire covers a variety of subjects which are presently being investigated to obtain additional information. Apart from biographical data, subjects being covered are:

Social movements in SA
Smoking
Language issues
SA disables tourism market

To obtain reliable, scientific information it is necessary that you answer the questions as honestly as you can. Your opinion is important in this research.

The area in which you live, as well as yourself have been selected randomly for the purpose of this survey, thus the fact that you have been chosen is quite coincidental. Your name will not be written anywhere on the questionnaire and you need not sign the questionnaire or any other documents. The information that you provide will be treated as confidential. It will be processed by computer in such a way that no personal identification will be possible.

THE NATURE AND EXTENT OF THE SOUTH AFRICAN DISABLED TOURISM MARKET

SATOUR IS CURRENTLY UNDERTAKING STUDIES TO DETERMINE THE NATURE AND EXTENT OF THE SOUTH AFRICAN DISABLED TOURIST MARKET. THE PRIMARY AIM OF THESE STUDIES IS TO GATHER THE NECESSARY INFORMATION WHICH IS NEEDED TO CONVINCE THE TOURISM INDUSTRY OF THE IMPORTANCE OF PROVIDING ACCESSIBLE FACILITIES FOR THOSE WITH IMPAIRMENTS.

1. Do you have a minor or a major disability as a result of birth, accident, age or illness? To be disabled means being unable to perform a task or function because of a physical or mental impairment. A person in a wheelchair displays his disability for all to see. However, many people have their mobility impaired to a less obvious extent, for example those who are arthritic, or whose sight or hearing is failing.

If no, go to Q3

Yes	1
No	2

65

2. If yes, indicate the nature of your disability (two most important areas only) (Don't read, merely indicate)

Aural (hearing disability – partial or total)	01
Visual disability (partial or total)	02
Physical (quadriplegic, paraplegic, hemiplegic, cerebral palsy, amputee, etc)	03
Speech impediment	04
Mental impediment	05
Other (specify).....	

66-67

3. Did you undertake a tourism trip in the past year? A tourist trip is a trip which involves travelling away from one's normal place of residence for a period of at least one night, but for a period which is less than one year. The main purpose of the trip is other than the exercise of any activity for which remuneration is received in the area being visited. Certain types of business trips, such as the attending of a conference or a business meeting, can thus be regarded as tourism trips. If a person is seeking work, doing contract work or specifically working and being paid by the area visited, then such a person is not a tourist.
