Version

VERSION DESCRIPTION

v2.1: Edited, anonymised dataset for licensed distribution.

Version 1 of the Income and Expenditure Survey 2005-6 was released by Statistics South Africa in the 1st Quarter of 2008. This version did not contain person-level data.

Version 2 of this dataset, which was released by Statistics South Africa in the 3rd Quarter of 2008, contains person-level data, and replaces the earlier version.

Version 2.1 has value labels added by DataFirst. In the older version (v2), a variable was split into two in the process of conversion from ASCII to Stata. The split variable "donkey" and "cart_ox_cart" have been corrected in version 2.1 to reflect the original variable "donkey_cart_ox_cart".

2008

NOTES

Version 1 of the Income and Expenditure Survey 2005-6 was released by Statistics South Africa in the 1st Quarter of 2008. This version did not contain person-level data.

Version 2 of this dataset, which was released by Statistics South Africa in the 3rd Quarter of 2008, contains person-level data, and replaces the earlier version.

Version 2.1 has value labels added by DataFirst. In the older version (v2), a variable was split into two in the process of conversion from ASCII to Stata. The split variable "donkey" and "cart_ox_cart" have been corrected in version 2.1 to reflect the original variable "donkey_cart_ox_cart".

Overview

ABSTRACT

The Income and Expenditure Survey 2005-2006 conducted by Statistics South Africa (Stats SA) between September 2005 and August 2006. The survey was designed to collect data on items and services acquired by South African households, sources of household income (monetary or in-kind) and household expenditure within a given reference period. Studies of this nature play an important role in evaluating changes in consumption patterns and income distribution. The data collected provides input to the goods and services for inclusion in the Consumer Price Index (CPI) basket of goods and services.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Units of analysis in the survey are households and individuals

Scope

NOTES

The survey collected data on all income received by household members and all goods and services obtained by the household over the 11 months prior to the survey, as well as during the survey month.

Coverage

GEOGRAPHIC COVERAGE

The survey had national coverage

UNIVERSE

The survey covered all de jure household members

Data Collection Notes

The IES 2005/2006 based on the diary method was the first of its kind to be conducted by Stats SA. Previously IESs were conducted by Stats SA every five years using the recall method. In the recall method a single questionnaire was administered to a household at a selected dwelling unit in the sample. The responding households were required to recall expenditure and sources of income for 12 months prior to the survey.

Stats SA decided to change the survey methodology, in line with international best practice, from the recall method to a combination of the recall and the diary methods. A fieldworker administered a main questionnaire to a selected household over five separate visits during which households were required to account for all income and for acquisitions of goods and services over the 11 months prior to the survey. During the four weeks of the survey month, households were also given diaries and were required to record their daily acquisitions in a diary on a daily basis. The diaries were collected on a weekly basis for a period of a month. The purpose of the diary was to try to minimise or eliminate the recall problem over the four weeks of the survey month so that the information collected was as accurate as possible
