## Scope

---

### NOTES

Data collected on ECD facilities includes registration of the facility, the geographical location of the site, basic infrastructure (access to roads, electricity, toilets, water) and special equipment. Other facility level data collected includes the financial base of the site, the nature of the site (school-based, home-based or community based), its sustainability (how long it has been operating), its operating hours, and key aspects of the educational activities at the site. At the educator level, the audit collected data on all educators at the site, including their age, gender, race, highest school grade, highest qualification, teaching experience, and monthly salary. Data was also gathered on learners at each site, including the total number of learners disaggregated by age group, race, and gender. Data was also captured on the number of learners with disabilities and the nature of such disabilities.

### DATA COLLECTION NOTES

For the purposes of the audit, an ECD site was defined as any public or private, formal or informal ECD location wherein educare is offered to groups of six or more learners. Existing databases within the Departments of Education, Health and Welfare, as well as those of training institutions (including those identified during the postal survey) were accessed. NGOs, CBOs, funding organisations and any other possible sources of site information were also asked to submit site lists to the NDE. An initial unverified list of 30,101 sites was compiled using agencies in the nine provinces. Of these, 4,673 were subsequently deleted by the provincial agencies as being duplicates, non-existent or closed, resulting in a revised total of 25,428 sites. Site data was ultimately collected on 23,482 sites (92%).
