

Wave 2 Changes between V3.0 & V3.1

This document highlights the changes between Wave 2 data V3.0 (previous public release data set) compared to V3.1.

Panel weights and post-stratified weights

There were some changes to the weights variables, *w2_pweight* in the *innderived* data file and the *w2_wgt* in the *hhderived* data file. Changes in these variables were caused by:

1. Missing panel weights for some babies born to CSM mothers after Wave 1 (2008).
2. One (now adult) respondent with a missing weight.
