

Wave 3 Changes between V2.0 & V2.1

This document highlights the changes between Wave 3 data V2.0 (previous public release data set) compared to V2.1.

Panel weights and post-stratified weights

There were some changes to the weights variables, *w3_pweight* in the *inderived* data file and the *w3_wgt* in the *hhderived* data file. Changes in these variables were caused by:

1. Missing panel weights for some babies born to CSM mothers after Wave 1 (2008).
2. One (now adult) respondent with a missing weight.
