Overview

ABSTRACT

The primary objective of SASAS is to design, develop and implement a conceptually and methodologically robust study of changing social attitudes and values in South Africa to be able to carefully and consistently monitor and explain changes in attitudes amongst various socio-demographic groupings. The SASAS explores a wide range of value changes, including the distribution and shape of racial attitudes and aspirations, attitudes towards democratic and constitutional issues, and the redistribution of resources and power. Moreover, there is also an explicit interest in mapping changing attitudes towards some of the moral issues that confront and are fiercely debated in South Africa, such as gender issues, AIDS, crime and punishment, governance, and service delivery. The SASAS is intended to provide a unique long-term account of the social fabric of modern South Africa, and of how its changing political and institutional structures interact over time with changing social attitudes and values.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

The units of analysis in the study are households and individuals

Scope

NOTES

The thematic content of the survey includes democracy, identity, public services, social values, crime, voting, demographics, families and family authority

TOPICS

Topic	Vocabulary	URI
religion and values [13.5]	CESSDA	http://www.nesstar.org/rdf/common
social behaviour and attitudes [13.6]	CESSDA	http://www.nesstar.org/rdf/common

Coverage

GEOGRAPHIC COVERAGE

The survey has national coverage

GEOGRAPHIC UNIT

The lowest level of geographic aggregation covered by the data is province

UNIVERSE

The population under investigation includes adults aged 16 and older in private households in South Africa

Sampling

Sampling Procedure

The South African Social Attitudes Survey (SASAS) is a nationally representative survey series that has been conducted on an annual basis by the Human Sciences Research Council's (HSRC) since 2003. The survey has been designed to yield a representative sample of adults aged 16 years and older. The sampling frame for the survey is the HSRC's second Master Sample, which was designed in 2007 and consists of 1 000 primary sampling units (PSUs). The 2001 population census enumerator areas (EAs) were used as PSUs.

These PSUs (EAs) were drawn, with probability proportional to size, from a sampling frame created by Professor David Stoker containing all 80,787 of the 2001 EAs. This sampling frame uses the estimated number of dwelling units (DUs) in an EA (PSU) as a measure of size. The sampling frame was annually updated to coincide with StatsSA's mid-year population estimates in respect of the following variables: province, gender, population group, and age group. In updating the 2007 version of this sampling frame, additional use was made of (a) the GeoTerralimage (GTI) residential structure count in all metropolitan EAs in 2004/2006 and (b) the ESKOM counts of dwelling units in all cities, towns, townships and villages.

The HSRC's second master sample excludes special institutions (such as hospitals, military camps, old age homes, school and university hostels), recreational areas, industrial areas, vacant EAs as well as the 1000 EAs included in the first HSRC's master sample (2003-2006). It therefore focuses on dwelling units or visiting points as secondary sampling units (SSUs), which have been defined as 'separate (non-vacant) residential stands, addresses, structures, flats, homesteads, etc.'.

For the 2007 SASAS round of interviewing, a sub-sample of 500 PSUs was drawn from the HSRC's 2nd Master Sample. Three explicit stratification variables were used, namely province, geographic type and majority population group. Within each stratum, the allocated number of PSUs was drawn using probability proportional to size sampling technique with the estimated number of dwelling units in the PSU as measure of size. In each of these drawn PSUs, 14 dwelling units were selected and systematically grouped into two sub-samples of seven, each corresponding to the two SASAS questionnaire versions.

Selection of individuals

Interviewers called at each visiting point selected from the 2nd HSRC master sample and listed all those eligible for inclusion in the sample, that is, all persons currently aged 16 or over and resident at the selected visiting point. The interviewer then selected one respondent using a random selection procedure based on a Kish grid.

Questionnaires

Overview

To accommodate the wide variety of topics included in the survey, two questionnaires were administered simultaneously. Apart from the standard set of demographic and background variables, each version of the questionnaire contained a harmonised core module.

The questions contained in the core modules of the two SASAS questionnaires (demographics and core thematic issues) were asked of 7000 respondents, while the remaining rotating modules were asked of a half sample of approximately 3500 respondents each.

The core module remains constant for with the aim of monitoring change and continuity in a variety of socio-economic and socio-political variables. In addition, a number of themes are accommodated in rotation. The rotating element of the survey consists of two or more topic-specific modules in each round of interviewing and is directed at measuring a range of policy and academic concerns and issues that require more detailed examination at a specific point in time than the multi-topic core module would permit.

Topics included in the questionnaires are: democracy, national identity, public services, moral issues, crime, voting, demographics and other classificatory variables.

Rotating modules are: child poverty, poverty, household expenditure, climate change / global warming, Soccer World Cup, service delivery, Batho Pele principles and smoking and tobacco behaviour.

International Social Survey Programme. (ISSP web page:www.issp.org/)

The International Social Survey Programme (ISSP) is run by a group of research organisations, each of which undertakes to field annually an agreed module of questions on a chosen topic area. SASAS 2003 represents the formalisation of South Africa's inclusion in the ISSP, the intention being to include the module in one of the SASAS questionnaires in each round of interviewing. Each module is chosen for repetition at intervals to allow comparisons both between countries (membership currently stands at 48) and over time. In 2007, the chosen subject was the leisure time and sport and the module was carried in version two of the questionnaire (Qs.1-60). This data can be accessed through the ISSP data portal (see link above).

Questionnaire Number (uniqueid)

File: sasas-2007-q1

Overview

Type: Continuous	Valid cases: 3164
Format: numeric	Invalid: 0
Width: 4	Minimum: 1
Decimals: 0	Maximum: 6993
Range: 1-6993	Mean: 3539.2
	Standard deviation: 1995.4

EA number (ea)

File: sasas-2007-q1

Overview

Type: Continuous	Valid cases: 3164
Format: numeric	Invalid: 0
Width: 8	Minimum: 10100003
Decimals: 0	Maximum: 98600968
Range: 10100003-98600968	Mean: 52996537.4
	Standard deviation: 24938686.4

Province (prov)

File: sasas-2007-q1

Overview

Type: Discrete	Valid cases: 3164
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

Number of households at visiting point (hhnum)

File: sasas-2007-q1

Overview

Type: Discrete	Valid cases: 3164
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-18	

Number of persons 16 years and older at visiting point (pers16)

File: sasas-2007-q1

Overview

Type: Continuous	Valid cases: 3164
Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 25
Range: 1-25	Mean: 3.2
	Standard deviation: 1.8

Number of persons in this household (hhpers)

File: sasas-2007-q1

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-19

Valid cases: 3164
 Invalid: 0

Number of persons 16 years and older in this household (hhpers16)

File: sasas-2007-q1

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-13

Valid cases: 3164
 Invalid: 0

Q1.1 The 3 MOST important challenges facing SA today?First (q1_1)

File: sasas-2007-q1

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-98

Valid cases: 3164
 Invalid: 0

Q1.2 The 3 MOST important challenges facing SA today?Second (q1_2)

File: sasas-2007-q1

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-98

Valid cases: 3078
 Invalid: 86

Q1.3 The 3 MOST important challenges facing SA today?Third (q1_3)

File: sasas-2007-q1

Overview

Q1.3 The 3 MOST important challenges facing SA today?Third (q1_3)

File: sasas-2007-q1

Type: Discrete
Format: numeric
Width: 2
