NOTES

Version 1 of the All Media and Products Survey 2011 was acquired from The South African Audience Research Foundation in August 2014.

Version 1.1 is the data converted to Stata files for research usage.

Overview

ABSTRACT

The South African Advertising Research Foundation (SAARF) conducts the All Media and Products Survey (AMPS) to collect data on media usage of South Africans, as well as their ownership or usage of certain products and services.

Technical information on the AMPS 2012 survey can be found at

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Units of analysis in the survey include individuals and households

Scope

NOTES

The survey collects demographic data on the surveyed households, including data on race, sex, age, income, education level and home language. Data is also collected on media used by households, including newspapers and magazines, television, and radio, as well as cinema attendance. The survey also collects data on ownership and usage of products and services.

Coverage

GEOGRAPHIC COVERAGE

The survey has national coverage

GEOGRAPHIC UNIT

The lowest level of geographic aggregation covered by the data is province.

UNIVERSE

The survey covers adults aged 15 years or older resident in private households, or hotels, residential hotels and similar accommodation in the Republic of South Africa.

Sampling

Sampling Procedure

The universe from which the AMPS sample is drawn, comprises adults aged 15 years or older in South Africa. In the case of each racial group, certain areas were excluded from consideration, as containing no persons or a negligible number of persons in a given group. A multistage, stratified, quasi-probability design was employed. This study is based on a full annual sample. The data were collected by personal, in-home interviews.

Weighting

The AMPS 2011 dataset has the following weight variables:

- 1) Adult Population Weights - "pwgt".
- 2) Household Weights (not to be used with personal demographics) - "hhwgt".
- 3) Household Decision Maker Weights - to be used with personal demographics. These must be used for personal analyses on household items - only on a filtered of male heads of household and female housewives - "hhdwgt".
- 4) Purchaser Weights - These must be used for the household products only on a filtered base of those wholly or partly responsible for household purchases - "hhpwgt".
