VERSION DESCRIPTION

v1: Edited, anonymised dataset for public distribution

PRODUCTION DATE

1997

Overview

ABSTRACT

This survey was designed to examine the determinants of political participation in a developing democracy. The study, conducted in Zambia, was administered in 1993 and 1996.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Units of analysis in the data were individuals

Scope

NOTES

Topics covered in both years include political attitudes and interest at the local and national levels, and degree of political knowledge. Questions were asked about the frequency of discussing political matters; whether the respondent had attended a training session on the topic of citizen rights; satisfaction with work, finances, health, and life; and what role chiefs and headmen should play in governing Zambia today. Additional questions in 1993 asked if crime was a major problem and in what ways crime had affected the respondent's life. Additional questions in 1996 asked if during the last five years the respondent had contacted a chief or headman, a member of Parliament, or some other influential person; if the respondent was satisfied with the general state of the Zambian economy; and how much leisure time the respondent had in an average day. Demographic variables provided for respondents include age, gender, education, tribe affiliation, language, employment status, occupation, personal and family income, marital status, and number of children.

Coverage

GEOGRAPHIC COVERAGE

The survey had national coverage. The lowest level of geographic aggregation of the data is district

UNIVERSE

The survey covered all Zambians eligible to vote as of the date the survey was administered.
