**NOTES**

Version 1 of the All Media and Products Survey 2010 was acquired from The South African Audience Research Foundation in May 2015.

Version 1.1 is the data converted to statistical analysis software for research usage.

## Overview

---

**ABSTRACT**

The South African Advertising Research Foundation (SAARF) conducts the All Media and Products Survey (AMPS) to collect data on media usage of South Africans, as well as their ownership or usage of certain products and services.

Technical information on the AMPS 2010 survey can be found at:

<http://www.saarf.co.za/amps-technicalreport/technicalreport-2010A/>

**KIND OF DATA**

Sample survey data [ssd]

**UNITS OF ANALYSIS**

Units of analysis in the survey include individuals and households

## Scope

---

**NOTES**

The survey collects demographic data on the surveyed households, including data on race, sex, age, income, education level and home language. Data is also collected on media used by households, including newspapers and magazines, television, and radio, as well as cinema attendance. The survey also collects data on ownership and usage of products and services.

## Coverage

---

**GEOGRAPHIC COVERAGE**

The survey has national coverage. The data was collected in the metropolitan areas of Cape Town, Durban, Johannesburg and Pretoria

**GEOGRAPHIC UNIT**

The lowest level of geographic aggregation covered by the data is province.

**UNIVERSE**

The survey covers adults aged 15 years or older resident in private households, or hotels, residential hotels and similar

accommodation in the Republic of South Africa.

# Sampling

## Sampling Procedure

---

The universe from which the AMPS sample is drawn, comprises adults aged 15 years or older in South Africa. In the case of each racial group, certain areas were excluded from consideration, as containing no persons or a negligible number of persons in a given group. A multistage, stratified, quasi-probability design was employed. This study is based on a full annual sample.

## Weighting

---

The AMPS 2010 dataset has the following weight variables:

- 1) Adult Population Weights - "pwgt".
- 2) Household Weights (not to be used with personal demographics) - "hhwgt".
- 3) Household Decision Maker Weights - to be used with personal demographics. These must be used for personal analyses on household items - only on a filtered of male heads of household and female housewives - "hhdwgt".
- 4) Purchaser Weights - These must be used for the household products only on a filtered base of those wholly or partly responsible for household purchases - "hhpwgt".
