### **ID NUMBER**

bot-who-gyts-2001-v1

## Version

---

### **VERSION DESCRIPTION**

v1: Edited, anonymised data for public distribution

### **PRODUCTION DATE**

2001

## Overview

---

### **ABSTRACT**

The GYTS is a school-based survey that collects data on students aged 13–15 years using a standardized methodology for constructing the sample frame, selecting schools and classes, and processing data. The GYTS surveillance system is intended to enhance the capacity of countries to design, implement, and evaluate tobacco control and prevention programs.

### Methodology

School-based survey of students aged 13–15 years

Multistage sample design with schools selected proportional to enrollment size

Classrooms chosen randomly within selected schools

All students in selected classes eligible for participation

Anonymous and confidential self-administered questionnaire

Countries may add questions to the questionnaire

Computer-scannable answer sheets

Requires only 30–40 minutes to administer

Fieldwork conducted in 6–8 weeks

Country-level data with regional-level stratification possible

Core questionnaire (standard set of survey questions used in all locations)

### **KIND OF DATA**

Sample survey data [ssd]

### **UNITS OF ANALYSIS**

Units of analysis were individuals

## Scope

---

### **NOTES**

The core module of the GYTS asks learners about their tobacco use and consumption intensity, and their use of smokeless tobacco products, and attempts to quit and relapses. The survey also collects data on their exposure to second-hand smoke,

access to and purchasing of tobacco products, learners' knowledge of tobacco advertising and anti-tobacco messages, and their attitudes and beliefs about using tobacco.

## Coverage

---

### GEOGRAPHIC COVERAGE

The survey had national coverage.

### UNIVERSE

The target group of the survey are learners aged 13-15 years in the selected schools.
