TITLE

Early Childhood Development Census 2009-2014

COUNTRY

Name	Country code
South Africa	zaf

STUDY TYPE

Enterprise/Establishment Census

ABSTRACT

In 2008, the South African government identified Early Childhood Development as a national priority. The National Department of Social Development (DSD) commissioned a national audit of registered Early Learning Centres. The scope was later extended to include centres with conditional registration, and unregistered centres. The aim of the audit was to obtain data on the nature and extent of ECD provisioning, services, resources and infrastructure in South Africa across registration statuses in order to inform and support ongoing policy and planning initiatives in the ECD sector. The Economic Policy Research Institute (EPRI) conducted the audit, which covered 19,971 ECD centres across the nine provinces. These comprised 17 846 audited ECD centres and 2 125 ECD centres where the questionnaire could not be administered.

KIND OF DATA

Census/enumeration data

UNIT OF ANALYSIS

Individuals and institutions

Version

VERSION DESCRIPTION

v1.1: Edited, anonymised dataset for public distribution

VERSION DATE

2014

VERSION NOTES

Version 1 data was deposited with DataFirst in 2017.

Version 1.1 data was anonymised by DataFirst.

Version 1.2 was further anonymised

Scope

NOTES

Data collected on ECD facilities includes: Registration of the facility, the geographical location of the site, infrastructure (access to roads, electricity, toilets, water), health and safety provision, and special equipment. Other facility level data collected included the financial base of the site, the nature of the site (school-based, home-based or community based), its sustainability (how long it has been operating), its operating hours, and key aspects of the educational activities at the site. At the educator level, the audit collected data on all educators at the site. Data was also collected on the curriculum and record-keeping at the facility. Learner data collected included the total number of learners, their age, gender, and race. Data was also captured on the number of learners with disabilities and the nature of these disabilities.

KEYWORDS

Keyword

Early childhood development

Early learning centres

Coverage

GEOGRAPHIC COVERAGE

The survey had national coverage.

GEOGRAPHIC UNIT

The lowest level of geographic aggregation of the data is Municipality.

UNIVERSE

The universe of the study included Early Childhood Development facilities, and educators and learners at these sites.
