

05/02/2007

Dear Lynn

Are you referring to Magisterial Districts (MD)? In that case it's the first 3 digits of the unique number. I can't see Stratum as one of the variables in the House file. I also cannot see DC in the data. You must remember that the OHS is sample survey and that the sample was explicitly stratified by province.

Hope this answers your question.

Hello Piet

I hope you are well.

We are working with the OHS 1998 files and need data at district level.

The house file does not have district information, but has a STRATUM variable, which is made up of the District and EA numbers.

Do you have the OHS 1998 that includes a DISTRICT variable? If so, could you send it to us?

Alternatively, could you tell us which numbers in the STRATUM variable make up the District information, so we can make a new variable for this?

Thanks

Lynn

Piet
