METHODOLOGY

Survey requirements and design

During the Quarterly Labour Force Survey (QLFS) of quarter three 2015, children aged 7–17 years were screened and later interviewed for the Survey of Activities of Young People (SAYP). The SAYP interviews were not conducted at the same time as the QLFS. This resulted in the reduction of SAYP persons as compared to the ones identified during QLFS screening. This was due to persons refusing to participate in SAYP, persons not at home during SAYP interviews, demolished structures, vacant dwellings, etc. If all qualifying SAYP children identified in QLFS responded positively during SAYP interviews, there would be no adjustment of SAYP weights. The final SAYP weights would be the same as the QLFS calibrated weights. The SAYP weight adjustment accounts for those persons who qualified for SAYP, but refused to take part or were not available for interviews and those that were considered to be other non-response.

Non-response adjustment

The non-response adjustment is done through the creation of adjustment classes. The adjustment classes are created using Response Homogeneity Groups (RHGs), where respondents have the same characteristics with non-respondents in the group. The response rate (which is the ratio of responses to all eligible units in the sample) is calculated within each class. The inverse of the response rate (adjustment factor) is calculated within each class, and the result is multiplied by the QLFS 2015 person's weights of the responding units to get the adjusted SAYP person weights for responding units. Children identified as ineligible for SAYP were not considered when calculating weights adjustment. In short, the weights of responding children are inflated to account for eligible children that did not respond during SAYP data collection.

Final survey weights

The final SAYP weight assigned to each responding unit is computed as the product of the QLFS person weight and the non-response adjustment factor. The sum of QLFS person weight qualifying for SAYP (for both respondents and non-respondents, excluding the out-of-scope persons) must be equal to the sum of the final SAYP person weight.

CONCEPTS AND DEFINITIONS

This chapter contains concepts and definitions used in the SAYP questionnaire. It is necessary to have a shared understanding of all the terms used in this manual and in the questionnaire. Having a common understanding will ensure that the correct procedures are followed and that the information obtained is accurate, reliable and comparable.

Child: A child is anyone under the age of 18 years, but for the purpose of this survey the age group of 7 to 17 years will be interviewed.

Commission: An amount that is usually paid to persons such as sales men/women who sell goods such as Tupperware, Avon products, or services such as insurance. The amount paid as a commission is usually linked to the quantity of the goods or service sold.

Early childhood development (ECD) programmes: ECD programmes are aimed at enhancing the development of a child's cognitive, emotional and physical skills, either at home or an ECD centre.

Economic activity: Specifically, contributing or available to contribute to the production of goods and services according to the United Nations System of National Accounts (SNA, 1993). This includes work for pay or in-kind; unpaid work in a family business; and domestic work in other households.

Household: A person or a group of people living together, sharing resources for at least four nights on average a week for the past four weeks. They basically live together as a unit. They usually eat from the same pot.

Household tasks: This includes doing the following in the child's household: preparing and serving meals; washing and ironing clothes; shopping; caring for siblings or the sick; cleaning and maintenance of the household or dwelling; and service and repairing of household durables (e.g. TVs, fridges, stoves, etc.).

Members of a household: Persons who meet the criteria of belonging to a household as mentioned above.

Paid domestic work: Includes activities such as cleaning, cooking, and gardening for a private household for a cash payment and does NOT include normal housework undertaken by household members.

Payment in kind: Payment undertaken, not in the form of cash, but in meals, accommodation, transport, etc., instead of cash.

Proxy: A proxy is someone who answers questions or provides information on behalf of someone else.

Wage: The amount of money paid for work done. When expressed with respect to time (usually per hour), it is called the wage rate. It is often the main monetary item upon which the worker and the employer focus when negotiating an employment contract. It is usually the only payment for unskilled labour.

Work: Any activity carried out by the respondent during the reference week: for pay as an employee; for profit as an employer or self-employed person; or for household gain (where household gain includes activities such as subsistence farming).

CONTENTS OF THE CD

The CD contains a flat, ASCII, fixed-field file, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programs as possible, and thus accessible to as wide a range of people as possible.

Users can also access, explore and download the micro data in various formats, i.e. SAS, SPSS, Stata, etc., as well as the metadata from StatsOnline at www.statssa.gov.za. Click on 'Interactive data', then 'Explore micro data'.

The data file

The data file contains information on sections 1, 2, 3, 4, 5, 6 and 7.

Each section contains the following information for each variable:

Description of variables

Descriptive name: This is a short description of the variable with the variable name in brackets.

Position of the variable: The position of a variable within a record is recorded in the format (@xxx y.). '@xxx' indicates that the variable starts at position (i.e. column) xxx, and 'y' indicates the length of the field.

Final code list: The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

Not applicable: The code for 'missing' values is given for each variable (□ = Not applicable).

Note to users: Additional information for further clarity on questions.

SECTION 1

This section covers particulars of each person in the household.

Question 1.2

Gender (Q12Gender)

(@22 1.)

1.2	Is a male or a female?	
	1 = MALE	<input type="checkbox"/> 1
	2 = FEMALE	<input type="checkbox"/> 2

Note to users

This question was asked for all household members, to determine their gender. Enumerators were instructed not to assume the gender of household members by just looking at people's names or physical appearances. In this instance, they had to ask the respondent the gender of each member of the household without any assumptions.

Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

1 = Male

2 = Female

Question 1.3*Age (Q13Age)**(@23 2.)*

1.3	<p>What is’s date of birth and age in completed years?</p> <p style="text-align: center;">Day (dd)</p> <p style="text-align: center;">Month (mm)</p> <p style="text-align: center;">Year (yyyy)</p> <p>Age (less than 1 year = 000)</p>
------------	---

Derived variable

This is a derived variable indicating the age of the household member. Age of the household member was derived from Question 1.4 of the questionnaire.

This question was asked for each member of the household. The instruction was to write the age in completed years to the nearest whole numbers and not in words. Thus, if a person was two years and six months, the instruction was to write the two completed years. For children aged less than a year, the instruction was to write 000.

Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

Valid range: 7–17

Question 1.4*Population group (Q14Population)**(@25 1.)*

1.4	What population group does belong to?	
	1 = AFRICAN/BLACK	<input type="checkbox"/> 1
	2 = COLOURED	<input type="checkbox"/> 2
	3 = INDIAN/ASIAN	<input type="checkbox"/> 3
	4 = WHITE	<input type="checkbox"/> 4
	5 = OTHER, <i>specify in the box at the bottom</i>	<input type="checkbox"/> 5

Note to users

This question was asked to determine the population group of persons from the selected dwelling units. The respondent had to answer for each member and the enumerator was not to make any assumptions. The enumerator was also instructed not to come to any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post-apartheid era, but it is important to find out the composition of the South African population.

Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

1 = African/Black

2 = Coloured

3 = Indian/Asian

-----	---	--

Note to users

This question was answered by the enumerator. It was recommended that if all the members of the household who qualified for this section were present, they should answer for themselves. It is by means of this question that the accuracy of the information received can be qualified, as it would reflect whether people answered for themselves or a proxy responded on their behalf.
