2018

NOTES

Overview

ABSTRACT

The Data on Alcohol and Tobacco in Africa (DATA) Project of the Economics of Tobacco Control Project at the University of Cape Town seeks to increase awareness of and access to economic and policy data for policies related to healthy diets and alcohol and tobacco control in sub-Saharan Africa. The project collated economic data on alcohol and food from Kenyan public records. Excise revenue data on these items was collected from these records for the period 1947-2017. Data on consumption, production, prices, trade, excise taxes and tax revenue of alcoholic beverages and food items were extracted from the annual reports and statistical abstracts published by the Kenya National Bureau of Statistics (1955-2017) and Economic Survey (1968-2018). Food consumption, tax revenue, trade, and price data are all imperative for sound research on the impact of food prices, excise tax and other policies on consumption, trade and revenue. This type of data collation is thus important for policy makers and public health advocates.

KIND OF DATA

Aggregate data

UNITS OF ANALYSIS

Other

Scope

NOTES

The dataset includes data on agricultural production, average retail price, consumption, trade (imports and exports) unit price of imports, unit price of domestic exports and excise revenue of selected foods (barley, beans, beef, beer, bread, coffee, juices, maize flour, maize grain, milk, milk for infants, mineral water, potatoes, rice, salt, sodas, spirits, sugar, tea, tobacco, tomatoes, wheat flour and wines).

KEYWORDS

alcohol, consumption, excise revenue, food, prices, production

Coverage

GEOGRAPHIC COVERAGE

This dataset has national coverage

UNIVERSE

This dataset includes aggregate price and quantity data on alcohol and food from Kenya. Excise revenue data covers the period 1947-2017. Data on consumption, production, prices, trade, excise taxes and tax revenue of alcoholic beverages and food items cover the periods 1955-2017 and 1968-2018.
