**MODULE II**

**Labour Force**

Check that a column has been filled in for each person aged **12 years or more**, listed on page 2.

The serial number of the person (as per page 2) should be inserted at the top of the corresponding column, on each page.

In this part of the questionnaire, provision has been made for 6 persons. In the case of a household with more than 6 members aged 12 years or more, an additional questionnaire has been used. Ensure that the questionnaires are attached together, ‘Continued in 2nd questionnaire’ written on first questionnaire and identification information same on both.

In this section, editing should be performed column-wise i.e., the information for a person be checked as a whole. Very often, inconsistencies can be corrected after analysing the answers to several questions. Similarly, information not clearly stated, can often be deduced or estimated from answers to other questions. For example, relationships exist between nature of business and occupation, occupation and salary, etc.

If a question does not apply to a person, the answer space for that question should have been struck off. For example, if at question 2.1 ‘Yes’ has been entered, questions 2.2 to 2.4 do not apply to that person. If you are not sure whether there should have been an answer to a particular question or a space be struck off, ask for advice. Code boxes for ‘not applicable’ questions should be left empty.
If the answer to a question has been entered as reported, check whether it can be classified into one of the listed categories of answers for that question and code appropriately, otherwise enter code for ‘Other’ which should as far as possible be avoided.

In addition to the codes listed here, the following coding manuals will also have to be consulted:-
(1) National Industrial Classification of Economic Activities (NSIC)
(2) National Classification of occupations (NCO)

If a sugar estate name has been entered but activity at question 2.7 is animal farming or crop cultivation, enter code ‘7’ for private enterprise.
