

Changes across public release versions of NIDS-CRAM Wave 2

1. V1.1.0 to V2.0.0

1.

Dataset	NIDS-CRAM
Variable/s	<i>w2_nc_ems_june</i> (and some variables thereafter in Section C of the questionnaire).
Change	Some cases needed to change from "2. No - I'm employed" to "No, I did nothing".
Reason for change	Due to a Zulu translation error.
Number of observations impacted	10
Notes	The result of following the skip patterns was that the next questions in the skip sequence needed to be changed to "-3. Missing" or system missing, where appropriate.

2.

Dataset	Derived
Variable	<i>w2_nc_empl_stat</i>
Change	10 observations changed from "3. Employed" to "-8. Refused"
Reason for change	This is a derived variable and the underlying variables changed due to a translation error in Zulu.
Number of observations impacted	10

3.

Dataset	Derived
Variable	<i>w2_nc_pweight_s</i>
Change	Added to derived data file.
Reason for change	Weights were scaled to the NIDS W5 population totals and the weights algorithms were updated.
Number of observations impacted	All.
