moz-acc-scs-2019-v1

TITLE  
Sustainable Cities Survey, Maputo 2019

SUBTITLE  
Maputo 2019

COUNTRY

Name
Mozambique

STUDY TYPE  
Household Survey [hh]

SERIES INFORMATION  
Croese, Sylvia. Sustainable Cities Survey 2019, Maputo [dataset]. Version 1. Cape Town: African Centre for Cities [producer]. Cape Town: DataFirst [distributor]. DOI: <https://doi.org/10.25828/acd7-7q30>

ABSTRACT  
The data was collected by the Project “Co-producing urban knowledge in Angola and Mozambique through community-led data collection: towards meeting SDG 11” based in the African Centre for Cities, at the University of Cape Town. The Project aimed to collect data on cities in the two Lusophone African countries to inform their national governments' attempts to achieve Sustainable Development Goals related to cities. The Project collected data from 1282 households in six neighbourhoods in the cities of Maputo and Luanda. Interviews and focus groups were also held in each of the neighbourhoods before (in the case of Maputo) and after (in the case of Luanda) the completion of the survey to collect qualitative data about the settlements. The survey findings were presented and discussed with local administrations and survey participants to triangulate and validate the results. The findings were then made available to national governments and other relevant stakeholders. The Project was funded by the International Science Council research funding programme, Leading Integrated Research for Agenda 2030 in Africa (LIRA 2030 AFRICA).

KIND OF DATA  
Sample survey data

UNIT OF ANALYSIS  
Households and individuals

## Version

VERSION DESCRIPTION

## Scope

NOTES

The survey collected data on households' knowledge of the SDGs, and demographic data (age, gender, marital status,

disability status, education, employment, income, home language) as well as data on place of birth, number of children and internal migration. Data was also collected on housing and tenancy, energy sources, water sources, waste disposal, asset ownership, media use, transport, leisure, hygiene and the environment, as well as community and political participation

## Coverage

### GEOGRAPHIC COVERAGE

The data was collected from settlements within each city. In Luanda these settlements were: Km 12A in the district of Viana (n=310), Nova Urbaniza 2 in Panguila (n=148), and Cariango in Cazenga (n=224). In Maputo these were Luis Cabral (n=200), Hulene B (n=200) and Chamanculo C (n=200). These together represent a total of 1282 households.

### GEOGRAPHIC UNIT

The data is made available at the level of settlements within each city.

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
Sylvia Croese	African Centre for Cities, University of Cape Town

### PRODUCERS

Name	Affiliation
Centre for Policy Analysis	Eduardo Mondlane University

### FUNDING AGENCY/SPONSOR

Name	Abbreviation	Role
LIRA 2030 Africa Programme	LIRA	Funding programme
International Science Council	ISC	Funding agency
Network of African Science Academies	NASAC	Funding agency
Swedish International Development Cooperation Agency	SIDA	Funding agency

### OTHER IDENTIFICATIONS/ACKNOWLEDGMENTS

Name	Affiliation	Role
Social Sciences and Humanities Research Council	SSHC	Funding of tablets
International Development Research Centre	IDRC	Funding of tablets

## Sampling

### SAMPLING PROCEDURE

In both cities, three self-built settlements were selected for the surveys. These settlement types are home to the majority of, mostly low income, urban dwellers in both cities, as opposed to wealthier households who live in planned and formally laid-out houses and apartment buildings

Self-built settlements vary by location, built environment, and levels of access to basic services. The research sample was stratified to reflect this variation through the selection of three settlements with similar typologies in each city: an old settlement from colonial times, a more recently built or expanded settlement, and a settlement that had undergone urban upgrading.

### RESPONSE RATE

Few participants declined to be interviewed. The enumerators would record the number of households they attempted to interview before completing a questionnaire (on average one house in Luanda and less than one in Maputo), but the data

does not distinguish between refusal to participate or no one being at home.

## Data Collection

### DATES OF DATA COLLECTION

Start	End	Cycle
2018-09	2018-10	Luanda surveys
2019-06	2019-07	Maputo surveys

### DATA COLLECTION MODE

Face-to-face [f2f]

### SUPERVISION

Ethics approval for data collection was given on 7 September 2018 by the Ethics in Research (EiR) Department of the Faculty of Engineering and the Built Environment, University of Cape Town

### DATA COLLECTION NOTES

Surveys were conducted in Luanda in September and October 2018. In Maputo the surveys were conducted in June and July 2019. Stakeholder engagement was from August 2018 (Luanda) until November 2019 (Maputo).
