# 1. Introduction

## 1.1 Background

The Governance Public Safety and Justice Survey (GPSJS) was developed from the erstwhile Victims of Crime Survey (VOCS) in response to a series of gaps that were identified during the strategic planning process for the organisational strategic plan and the current Medium Term Strategic Framework (MTSF). Stats SA evaluated current statistical production against the National Development Plan (NDP) and various statistical information gaps, including the absence of Governance statistics, were identified. It was found at the time that the statistical requirements for planning and measuring progress and impact, for most of these NDP targets were not at all, or only partially met. Several Chapters in the NDP 2030 deal with aspects related to Governance. These are Chapter 12 (Building safer communities – MTSF Outcome 3), Chapter 13 (An accountable developmental state), Chapter 14 (fighting corruption) in the NDP 2030, and Chapter 15 (Transforming society and uniting the country – MTSF Outcome 14 (Nation building and Social cohesion)).

In addition, South Africa is a signatory to several international conventions and statutes. It reports regularly on progress towards their implementation. The Sustainable Development Goals (SDGs), particularly Goal 16 and Africa Agenda 2063, have some targets and indicators that relate to governance, access to justice, and human rights. For South Africa as a developmental state, governance statistics have to be defined in a broader sense than just government effectiveness and performance. Based on the United Nations Development Program (UNDP) and World Bank (WB) dimensions of Governance, the South African Constitution, the NDP, and the MTSF, five Governance themes relevant to the South African Governance imperatives emerge. These themes are:

- Legitimacy, voice, and equity
- Direction and leadership
- Government effectiveness and performance
- Rule of law
- Accountability, transparency, and control of corruption

The re-engineered GPSJS retained many items from the Victims of Crime Survey (VOCS), while new content was added. The GPSJS is a countrywide household-based survey that aims to bridge the statistical information gaps in the field of Governance statistics by conducting interviews with households and individuals and collecting the data items needed for planning and monitoring. While the GPSJS cannot replace police and other administrative data sources, it can be used to supplement official administrative records related to Governance statistics.

The GPSJS was conducted for the first time in South Africa in 2018/19 as an updated version of the long-running VOCS to include themes on governance. The rule of law and control of corruption were the only themes or sub-themes covered by VOCS prior to 2018. To achieve a reasonable balance between questionnaire length and depth of questions, a three-year rotation regime was adopted where the five themes are spread over a three-year period. Once in three years, the GPSJS will measure, in detail the general experience (including perceptions) of crime experienced by households and individuals in the country.

This report covers aspects of dimension 3 (government effectiveness and performance), dimension 4 (rule of law) and dimension 5 (accountability, transparency, and control of corruption). The other dimensions will be included in future reports, as and when they are deemed to be areas of concern.

## 1.2 Objectives of the survey

The GPSJS is a countrywide household-based survey and the objectives of the survey are to provide information on:

- Perceptions about citizen interaction/ community cohesion.
- Trust in government/public institutions.
- Government's performance & effectiveness.
- Experience of corruption.
- General individual perceptions.
- Household and individual perceptions and experience of crime.

## 1.3 Survey scope

The target population of the survey consists of all private households in all nine provinces of South Africa and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons, and military barracks – and is – therefore, the only representative of non-institutionalised and non-military persons or households in South Africa.

## 2. Target population

The target population of the survey consists of all private households in all nine provinces of South Africa, as well as residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons and military barracks. It is only representative of non-institutionalised and non-military persons or households in South Africa.

## 3. Purpose of this document

This document provides sufficient information that will allow users to properly use and interpret statistical information, as well as understand the properties of data. To make sure that information is interpretable, this metadata will give descriptions of the underlying concepts, variables and classifications that have been used, and the method of data collection, processing and estimation used in the production of statistics.

## 4. Structure of the document

The GPSJS 2019/20 metadata is presented in numerous files, which include flat files, ASCII, fixed field files, with one line of a given length per record. These formats make the data usable with as many statistical programs as possible, thus making it accessible to a wider range of users.

The files and the corresponding sections of the questionnaire are as follows:

Person file: Contains information from the Person Information section of the questionnaire

Household file: Contains Household Information, Household Income Sources and Economic Activities (Section 1), Citizen Interaction (Section 2) and Experience of household crime information (Section 3)

Individual file: Contains information on General Health and Functioning, Economic Activities and Information Communication Technology (Section 4), Trust in Government/Public Institutions (Section 5), Government's Performance and Effectiveness (Section 6), Experience of Corruption (Section 7), General Individual Perceptions (Section 8) and Individual experience of crime (Section 9).

Since this metadata is mainly for the public use of microdata files, information in each file contains the following:

- Nature of records in the file and population covered
- Description of variables
- Questions
- Codelist

### Description of variables

The description of the variables comprises the following information:

**Descriptive name:** This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

**Position of the variable:** The position of the data within the record, recorded in the format (@xxx y.). '@xxx' indicates that the data begins at position (i.e. column) xxx and 'y' indicates that it is y digits wide. All data is numeric. All data is right justified.

**Source:** This is either the question in the questionnaire or, for derived variables, the method of derivation. Derived variables are usually found towards the end of a file.

**Valid range:** The range of valid values for the variable. For continuous variables this reflects the upper and lower limits as found in the data.

**Not applicable:** A numeric code for 'not applicable' is provided for each variable.

**Missing value:** A code for 'missing/unspecified' values is given for each variable.

**Notes to user:** Specific observations to be noted by users.

**Linking files:** The data from different files can be linked on the basis of a record identifier. A unique number is the record identifier in the first field/s of each file and is unique to each record. All records with a given unique number belong to the same household.

## 5. Accessibility of data

Users can access the questionnaire and publications, explore and download the microdata in various formats, i.e. SAS, SPSS, Stata, etc. from StatsOnline at [www.statssa.gov.za](http://www.statssa.gov.za).

## 6. Survey requirements and design

The sample design, data collection, structural editing and imputation, and the weighting process and response rates are discussed below.

## 6.1 Sample design

The GPSJS 2019/20 uses the master sample (MS) sampling frame which has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with GPSJS. The GPSJS 2019/20 collection was drawn from the 2013 master sample. This master sample is based on information collected during Census 2011. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). The census EAs, together with the auxiliary information for the EAs, were used as the frame units or building blocks for the formation of primary sampling units (PSUs) for the master sample, since they covered the entire country and had other information that is crucial for stratification and creation of PSUs.

There are 3 324 primary sampling units (PSUs) in the master sample with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current master sample (3 324) reflect an 8,0% increase in the size of the master sample compared to the previous (2008) master sample (which had 3 080 PSUs). The larger master sample of PSUs was selected to improve the precision (smaller coefficients of variation, known as CVs) of the GPSJS estimates.

The Master Sample is designed to be representative at provincial level and within provinces at metro/non-metro levels. Within the metros, the sample is further distributed by geographical type. The three geography types are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area, the sample is representative of the different geography types that may exist within that metro. The sample for the GPSJS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

## 6.2 Data collection

The GPSJS was conducted for the first time in South Africa in 2018/19. GPSJS is an updated version of the long-running Victims of Crime Survey (VOCS) to include themes on governance, as discussed in the introduction. The rule of law and control of corruption were the only themes or sub-themes covered by VOCS prior to 2018. To achieve a reasonable balance between questionnaire length and depth of questions, a three-year rotation regime was adopted where the five themes are spread over a three-year period. Once in three years, GPSJS will measure in detail the general experience of household and individual crime in the country.

Stats SA conducted the second annual GPSJS and data collection took place from April 2018 to March 2019 with a moving reference period of 12 months. This is different from the 2011 and 2012 collections, which were done from January to March and had a fixed reference period from January to December of the previous year. The sample has been distributed evenly over the whole collection period in the form of quarterly allocations.

This will provide a guarantee against possible seasonal effects in the survey estimates. It will, in future, provide an opportunity for the production of rolling estimates relating to any desired time period. It has been noted that the change of data collection methodology may cause concerns over the survey estimates, particularly upon comparisons of years before and after the change. Victimisation questions referred to the twelve calendar months ending with the month before the interview. Statistics South Africa is committed to meeting the highest ethical standards in its data collection processes. In addition to being bound to the Statistics Act (Act No. 6 of 1999), the GPSJS, due to its sensitive nature, required additional measures to ensure that the integrity and well-being of the households are protected.

## 6.3 Questionnaire

Table 7 summarises the details of the questions included in the GPSJS questionnaire. The questions are covered in 9 sections, each focusing on a particular aspect. Depending on the need for additional information, the questionnaire is adapted on an annual basis. New sections may be introduced on a specific topic for which information is needed or additional questions may be added to existing sections. Likewise, questions that are no longer necessary may be removed.

**Table 29: The structure of the GPSJS 2019/20 questionnaire**

Section	Number of questions 2019/20	Details of each section
<b>Cover page</b>		Household information, response details, field staff information, result codes, etc.
<b>Person information</b>	13	Demographic information (name, sex, age, population group, etc.)
<b>Part 01: Household Information</b>		
<b>Section 1</b>	7	Household Income Sources and Economic Activities.
<b>Section 2</b>	5	Citizen Interaction/ Community Cohesion
<b>Section 3</b>	46	Experience of Household Crime
<b>Part 02: Individual Respondent</b>		
<b>Section 4</b>	16	General Health and Functioning, Economic Activities and Information and Communication Technology.
<b>Section 5</b>	14	Trust in government/ public institutions
<b>Section 6</b>	22	Government's Performance and Effectiveness
<b>Section 7</b>	2	Experience of Corruption.
<b>Section 8</b>	14	General Individual Perceptions
<b>Section 9</b>	34	Individual Experience of Crime
<b>Survey Officer Questions</b>	5	Survey officer to answer questions
<b>All sections</b>	<b>178</b>	

## 6.4 Response rates

**Table 30: Response rates per province, GPSJS 2019/20**

<b>Province / Metropolitan Area</b>	<b>Response Rates</b>
<b>Western Cape</b>	<b>84,60</b>
Non-Metro	94,13
City of Cape Town	80,32
<b>Eastern Cape</b>	<b>93,95</b>
Non-Metro	96,58
Buffalo City	91,25
Nelson Mandela Bay	86,80
<b>Northern Cape</b>	<b>91,78</b>
<b>Free State</b>	<b>91,56</b>
Non-Metro	93,50
Mangaung	87,50
<b>KwaZulu-Natal</b>	<b>90,78</b>
Non-Metro	92,78
eThekweni	87,08
<b>North West</b>	<b>88,68</b>
<b>Gauteng</b>	<b>73,39</b>
Non-Metro	83,03
Ekurhuleni	79,94
City of Johannesburg	67,30
City of Tshwane	70,58
<b>Mpumalanga</b>	<b>90,70</b>
<b>Limpopo</b>	<b>97,38</b>
<b>South Africa</b>	<b>86,04</b>

## 6.5 Editing and imputation

Data editing is concerned with the identification and, if possible, the correction of erroneous or highly suspect survey data. Data was checked for valid range, internal logic and consistency. The focus of the editing process was on clearing up skip violations and ensuring that each variable only contains valid values. Very few limits to valid values were set and data were largely released as they were received from the field. When dealing with internal inconsistencies, logical imputation was used, i.e. information from other questions was compared with the inconsistent information. If other evidence was found to back up either of the two inconsistent viewpoints, the inconsistency was resolved accordingly. If the internal consistency remained, the question subsequent to the filter question was dealt with by either setting it to missing and imputing its value or printing a message of edit failure for further investigation, decision-making and manual editing. Hot-deck imputation was used to impute for missing age.

## 6.6 Construction of household sample weights

The sample weights were constructed in order to account for the following: the original selection probabilities (design weights), adjustments for PSUs that were sub-sampled or segmented, excluded population from the sampling frame, non-response, weight trimming, and benchmarking to known population estimates from the Demographic Analysis Division within Stats SA. The sampling weights for the data collected from the sampled households were constructed so that the responses could be properly expanded to represent the entire civilian population of South Africa. The design weights, which are the inverse sampling rate (ISR) for the province, are assigned to each of the households in a province.

The household sample weights for GPSJS 2019/20 were constructed in such a manner that the responses from the respondent households could be properly expanded to represent the household population. The sample weights therefore are a product of several factors, including the original selection probabilities (design weights), adjustments for PSUs that were sub-sampled or segmented, excluded population from the sampling frame, non-response, weight trimming and benchmarking to known household estimates.

The base weights for the household weighting process are the same as those for the person weighting process. The adjustments applied to the base weights to obtain the adjusted base weights for household weighting. In the final step of constructing the household sample weights, the adjusted base weights were calibrated such that the aggregate totals match with the independently derived household estimates (as determined by Stats SA Demography Division) by the head of household's age, population group and gender at national and provincial levels. The calibrated weights are constructed with a lower bound on the calibrated weights of 50 within the StatMx software from Statistics Canada.

The household estimates were used in benchmarking to two sets of control totals:

National level totals that were defined by the cross-classification of age, population group and gender of the head of the household. Age represents the four age groups of 0–34, 35–49, 50–64 and 65+. Population group represents the four groups of black African, coloured, Indian/Asian and white. Gender represents the two groups of male and female. The cross-classification resulted in 32 calibration cells at the national level.

Provincial level totals were defined within the provinces by age of head of household. The country has 9 provinces; Age represents the four age groups of 0–34, 35–49, 50–64 and 65+. The cross-classification of the areas with age resulted in 36 calibration cells.

## 6.7 Individual sample weights

The final survey weights were constructed by calibrating the non-response-adjusted design weights to the known population estimates as control totals using the 'Integrated Household Weighting' method. The GPSJS 2019/20 sample was calibrated using the Population Estimates as at the end of September 2019 (based on the 2018 series). The final weights were benchmarked to the known population estimates of 5-year age groups by population groups by gender at national level, and broad age groups at province level. The 5-year age groups are: 0–4, 5–9, 10–14, 15–19, 20–24, 25–29, 30–34, 35–39, 40–44, 45–49, 50–54,

55–59, 60–64, 65–69, 70–74, and 75 and older. The provincial level age groups are 0–14, 15–34, 35–64; and 65 years and older. The calibrated weights are constructed such that all persons in a household would have the same final weight.

The GPSJS 2019/20 had an extra level of selection where one person, 16 years or older, was selected per household to complete sections 4 to 9 of the questionnaire. The individual weights were benchmarked to an estimated national population of age 16 and older. Records for which the age, population group or gender had item non-response could not be weighted and were therefore excluded from the dataset. No additional imputation was done to retain these records.

## **6.8 Estimation**

The final survey weights were used to obtain the estimates for various domains of interest at a household level, for example, victimisation level in South Africa; households' perceptions of crime levels in the country, etc.

## **6.9 Sampling and the interpretation of the data**

Caution must be exercised when interpreting the results of the GPSJS at low levels of disaggregation. The sample and reporting are based on the provincial boundaries as defined in 2011. These new boundaries resulted in minor changes to the boundaries of some provinces, especially Gauteng, North West, Mpumalanga, Limpopo, Eastern Cape, and Western Cape. In previous reports the sample was based on the provincial boundaries as defined in 2006, and there will therefore be slight comparative differences in terms of provincial boundary definitions.

## **6.10 Differences between GPSJS and police-reported data**

The most basic difference between the two types of crime measurement is the method of data collection. Police reported statistics to obtain data from police administrative records. In contrast, victim surveys collect both household and personal information about their victimisation experiences, through face-to-face interviews. The survey covers victims' experiences of crime at microdata level, including the impact of crime on victims.

Police-reported statistics normally collate information on all incidents reported to a variety of police stations. Victim surveys ask a sample of the population about their experiences and, if well designed, this sample should be representative of the population as a whole. Although police statistics and victim surveys normally cover comparable geographic areas, if appropriately nationally representative, victim surveys may exclude some categories of victims, such as very young children or persons residing in institutions such as a prisons, hospital, care centres, or military barracks. The reference period for the police-recorded statistics is April 2019 to March 2020, whereas the reference period of the GPSJS 2019/20 estimates is April 2019 to February 2020.

## **6.11 Measures of precision for selected variables of the GPSJS**

This section provides an overview of the standard error, confidence interval, coefficient of variation (CV), and the design effect (Deff) for a number of selected person and household variables. Estimates were computed based on a complex multistage survey design with stratification, clustering, and unequal weighting. The standard error is the estimated measure of variability in the sampling distribution of a statistic. The design effect for an estimate is the ratio of the actual variance (estimated based on the sample design) to the variance of a simple random sample with the same number of observations (Lohr, 1999; Kish, 1965). Coefficient of variation (CV) is a measure of the relative size of error defined as  $100 \times (\text{standard error} / \text{estimated value})$ .

Figure 53: Coefficient of variation thresholds

<u>Alphabetic</u>	<u>CV</u>	<u>Interpretation</u>
A.	0.0% - 0.5%	Reliable enough for most purposes
B.	0.6% - 1.0%	
C.	1.1% - 2.5%	
D.	2.6% - 5.0%	
E.	5.1% - 10.0%	
F.	10.1% - 16.5%	
G.	16.6% - 25.0%	Use With Caution
H.	25.1% - 33.4%	
I.	33.5% +	Data Not Published

## 6.12 Definitions of terms

**A household** is a group of persons who live together and provide themselves jointly with food and/or other essentials for living, or a single person who lives alone.

Note: The persons basically occupy a common dwelling unit (or part of it) for at least four nights in a week on average during the past four weeks prior to the survey interview, sharing resources as a unit. Other explanatory phrases can be 'eating from the same pot' and 'cook and eat together'.

Persons who occupy the same dwelling unit but do not share food or other essentials, are regarded as separate households. For example, people who share a dwelling unit, but buy food separately, and generally provide for themselves separately, are regarded as separate households within the same dwelling unit. They are generally referred to as multiple households (even though they may be occupying the same dwelling).

Conversely, a household may occupy more than one structure. If persons on a plot, stand or yard eat together, but sleep in separate structures (e.g. a room at the back of the house for single young male members of a family), all these persons should be regarded as one household.

**Multiple households** occur when two or more households live in the same dwelling unit.

Note: If there are two or more households in the selected dwelling unit and they do not share resources, all households are to be interviewed. The whole dwelling unit has been given one chance of selection and all households located there were interviewed using separate questionnaires.

**Household head** is the main decision-maker, or the person who owns or rents the dwelling, or the person who is the main breadwinner.

**Acting household head** is any member of the household acting on behalf of the head of the household.

**Formal dwelling** refers to a structure built according to approved plans, i.e. house on a separate stand, flat or apartment, townhouse, room in backyard, rooms or flatlet elsewhere. Contrasted with informal dwelling and traditional dwelling.

**Informal dwelling** is a makeshift structure not erected according to approved architectural plans, for example shacks or shanties in informal settlements or in backyards

**State media or state-owned media** is media for mass communication which is controlled financially and editorially by the state.

**Social grant** refers to grants paid by government to South African citizens who are in need of assistance. In South-Africa, social grants are administered by SASSA.

**Government: The national government of SA is composed of three inter-connected branches:**

- Legislative: Parliament, consisting of the National Assembly and the National Council of Provinces
- Executive: The President, who is both Head of State and Head of Government
- Judicial: The Constitutional Court, the Supreme Court of Appeal, and the High Court

**Corruption** is the misuse of entrusted power, by an elected politician or appointed civil servant, for private gain.

**Bribery** is a specific form of corruption where a public official receives money, gift or favour in exchange for a government service.

**Corporal punishment** is a punishment intended to cause physical pain on a person. It is most often practiced on minors, especially in the home and school settings.

**A caregiver** is someone who assists another person who cannot live fully independently due to physical, psychological, or mental disability

**Paedophile** is a person who is sexually attracted to children (person under the age of 18 years).

Table 31: SAPS and GPSJS definitions of crime

SAPS	GPSJS
<p>Murder</p> <p>Murder consists of the unlawful and intentional killing of another human being.</p>	<p>Murder</p> <p>Unlawful and intentional killing of another human being.</p>
<p>Sexual offences</p> <p>Rape, compelled rape, sexual assault, compelled sexual assault, compelled self-sexual assault, incest, bestiality, sexual act with corpse, acts of consensual sexual penetration with certain children (statutory rape), acts of consensual sexual violation with certain children (statutory sexual assault).</p>	<p>Sexual offences</p> <p>Refers to grabbing, touching someone's private parts or sexually assaulting or raping someone. Note: In terms of the Sexual Offences Act No. 32 of 2007 section 5, (1) A person ('A') who unlawfully and intentionally sexually violates a complainant ('B'), without the consent of B, is guilty of the offence of sexual assault. (2) A person ('A') who unlawfully and intentionally inspires the belief in a complainant ('B') that B will be sexually violated is guilty of the offence of sexual assault.</p>
<p>Assault with intent to inflict grievous bodily harm</p>	<p>Assault (excludes sexual assault)</p>

<p>Assault with the intent to cause grievous bodily harm is the unlawful and intentional direct or indirect application of force to the body of another person with the intention of causing grievous bodily harm to that person.</p>	<p>Direct or indirect application of force to the body of another person which may cause bodily harm, or threat of application of immediate personal violence to another, in circumstances in which the threatened person is prevailed upon to believe that the person who is threatening him/her has the intention and power to carry out his/her threat.</p>
<p>Common assault</p> <p>Assault is the unlawful and intentional —</p> <p>(a) direct or indirect application of force to the body of another person, or</p> <p>(b) threat of application of immediate personal violence to another, in circumstances in which the threatened person is prevailed upon to believe that the person who is threatening him/her has the intention and power to carry out his/her threat.</p>	
<p>Common robbery</p> <p>Robbery is the unlawful and intentional forceful removal and appropriation of movable tangible property belonging to another.</p>	
<p>Robbery with aggravating circumstances</p> <p>Robbery with aggravating circumstances is the unlawful and intentional forceful removal and appropriation in aggravating circumstances of movable tangible property belonging to another.</p>	<p>Robbery (excludes home robbery and car/truck hijackings)</p> <p>Unlawfully obtaining property with use of force or threat of force against a person with intent to permanently or temporarily withhold it from a person.</p>
<p>Hijacking</p> <p>Robbery of a motor vehicle is the unlawful and intentional forceful removal and appropriation of a motor vehicle (excluding a truck) belonging to another.</p>	<p>Hijacking of motor vehicle</p> <p>Unlawful and intentional forceful removal and appropriation of a motor vehicle from the occupant(s).</p>
<p>Truck hijacking</p> <p>Robbery of a truck is the unlawful and intentional forceful removal and appropriation of a truck (excluding a light delivery vehicle) belonging to another.</p>	

<p>Robbery of cash-in-transit</p> <p>Cash-in-transit robbery is the unlawful and intentional forceful removal and appropriation of money or containers for the conveyance of money, belonging to another while such money or containers for the conveyance of money are being transported by a security company on behalf of the owner thereof.</p>

Table 32: SAPS and GPSJS crime types

SAPS crime category	Type of crime – SAPS	Type of crime – GPSJS
Crime against person	Murder	Murder
	Attempted murder	
	Sexual offences	Sexual offences
	Assault with intent to inflict grievous bodily harm	
	Common assault	Assault (excludes sexual assault)
	Common robbery	
	Robbery with aggravating circumstances	Robbery (excludes home robbery and car/truck hijackings)
Sexual offences	Rape	
	Sexual assault	

	Attempted sexual offences	
	Contact sexual offences	
Trio crimes	Carjacking	Hijacking of motor vehicle
	Truck hijacking	
	Robbery of cash-in-transit	
	Bank robbery	
	Robbery at residential premises	Home robbery
	Robbery at non-residential premises	
Property-related crime	Burglary at residential premises	Housebreaking
	Theft of motor vehicle & motorcycle	Theft of motor vehicle
	Theft out of or from motor vehicle	Theft out of motor vehicle
	Stock theft	Theft of livestock/poultry and other animals
		Theft of personal property
Other property-related crimes	Arson	Deliberate damage/burning/destruction of dwellings
	Malicious damage of residential premises	
		Theft of bicycle
		Theft of crops
Crime detected as a result of police action	Drug-related crime	

	Driving under the influence of alcohol or drugs	
	Sexual offences detected as a result of police action	
Other crimes	All theft not mentioned elsewhere	Corruption
	Commercial crimes	Consumer fraud
	Illegal possession of firearms or ammunition	

## PART 01: HOUSEHOLD INFORMATION

Data file: HOUSEHOLD

Unique number (UQNO) (@1 18)

### Unique Household Identifier

Valid range: 160100090000007301-- 987106920000053801

Gender of the household head ( head\_sex) (@19 1)

<b>C</b>	<b>Is ... a male or a female?</b> 1 = Male 2 = Female
----------	---

### Note to users:

This question is asked to the household head, to determine their gender.

### Universe:

Respondents who answered 'Yes' to Question B.

### Final code list:

1 = Male  
2 = Female

Population group of the household head (head\_population) (@20 1)

<b>E</b>	<b>What population group does ... belong to?</b> 1 = Black African 2 = Coloured 3 = Indian/Asian 4 = White 5 = Other (Specify )
----------	--

### Note to users:

This question is asked to determine the population group of persons from the selected dwelling.

**Universe:**

All households in the selected dwellings.

**Final code list:**

- 1 = Black African
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White
- 5 = Other

*Age of household head (head\_age) (@21 3)*

<b>D</b>	<b>What is ...'s date of birth and age in completed years?</b> Age in years
----------	--

**Note to users:**

This question is asked to each household member, to determine his or her age.

**Universe:**

All households in the selected dwellings.

**Final code list:**

Valid range: 16–117

*Household size (hsize) (@24 2)*

**Note to users**

Size of household.

**Final code list:**

Valid range: 1–24

## SECTION 1: HOUSEHOLD INCOME SOURCES AND ECONOMIC ACTIVITIES

Household income sources – Wealth (Q11PRESENT) (@26 1)

<b>1.1</b>	<b>Would you say you and your household are at present ...</b> 01 = Wealthy 02 = Very comfortable 03 = Reasonably comfortable 04 = Just getting along 05 = Poor 06 = Very poor
------------	--

**Universe:**

All households in the selected dwellings.

**Final code list:**

01 = Wealthy  
02 = Very comfortable  
03 = Reasonably comfortable  
04 = Just getting along  
05 = Poor  
06 = Very poor

Household income sources – Household sources of income (Q12IncomeSo)

<b>1.2</b>	<b>Which of the following sources of income does the household have? i.e. list all sources of income.</b> 01 = Salaries and wages 02 = Net profit from business or professional practice/activities of commercial farming 03 = Income from subsistence farming 04 = Income from letting of fixed property 05 = Regular payments from pension fund from previous employment and pension from annuity funds 06 = Social grants (including old age grant) 07 = Maintenance, spousal support and similar allowances from divorced spouse, family members, etc., living elsewhere 08 = Regular allowance/remittances received from non-household members 09 = Other income (e.g. royalties, interest, dividends on shares, income from share trading)
------------	---

This question aims to assess if the respondent tried to obtain a permanent residence permit from the department of home affairs.

**Universe:**

Randomly selected individual respondent older than 16 years.

**Final code list:**

1 = Yes

2 = No

9 = Unspecified

*Apply for ID online–(Q631Online\_ID)*

(@121 1)

<b>6.3.1</b>	<b>Did you apply online for your Identity Document (Green ID book/Smart Card)?</b> 01 = Yes 02 = No
--------------	---

**Note to users:**

What we are interested in here is whether respondent applied online for an Identity document (ID)/ Smart Card.

**Universe:**

Randomly selected individual respondent older than 16 years.

**Final code list:**

1 = Yes

2 = No

9 = Unspecified

*Online application ID–(Q632Online\_PAS)*

(@122 1)

<b>6.3.2</b>	<b>Did you apply online for your Passport?</b> 01 = Yes 02 = No
--------------	---

**Note to users:**

What we are interested in here is whether respondent applied online for a passport.

**Universe:**

Randomly selected individual respondent older than 16 years.

**Final code list:**

1 = Yes

2 = No

9 = Unspecified

*Last time tried to obtain ID–(Q64LstID)*

<b>6.4</b>	<b>Please indicate whether you Agree (YES) or Disagree (NO) with the following statements about the most recent time you tried to obtain an Identity Document (Green ID book/Smart Card) in the past 12 months: Would you say...</b> 01 = The 'point-of-service' (office, phone number, website) was easily accessible 02 = The fees you needed to pay for the ID book were affordable to you 03 = You were treated with respect 04 = The process for applying and obtaining the ID book was straightforward and easy to understand 05 = The amount of time it took to obtain the ID book was reasonable
------------	---

**Note to users:**

These series of statements will provide an assessment of the respondent most recent time he/she tried to obtain an Identity Document (ID)/Smart Card.

**Universe:**

Randomly selected individual respondent older than 16 years.

**Final code list:**

01 = The 'point-of-service' (office, phone number, website) was easily accessible

02 = The fees you needed to pay for the ID book were affordable to you

03 = You were treated with respect

04 = The process for applying and obtaining the ID book was straightforward and easy to understand
