INTRODUCTION AND CONSENT

Hello. My name is _____. The Institute of Social Studies and Analyses is conducting an important international survey of adult tobacco use. One of your household member was selected to be interviewed approximately one year ago and we agreed then that after one year he/she would again participate in the survey in order to measure any possible changes that might have happened in terms of obtaining and consuming tobacco products. The information we collect will help non-governmental organizations to promote public health policies.

The survey usually takes about 20 minutes. All of the answers you give will be confidential and will not be shared with anyone other than members of our survey team. The researchers will not attempt to identify you or name you as a participant in the study, nor will they facilitate anyone else's doing so. We are in no way linked to any state authority or any commercial enterprise. There are no known risks or dangers to you associated with this study.

In case you need more information about the survey, you may contact Ms Lali Sutiasvili, who is the project coordinator in the Institute of Social Studies and Analyses. Her mobile number is 599 506143.

Do you have any questions? May I begin the interview now with previously interviewed respondent?

I acknowledge that I am participating in this study of my own free will. I understand that I may refuse to participate or stop participating at any time without penalty.
