## **Methodology**

### **Introduction**

The Quarterly Labour Force Survey (QLFS) sample covers the non-institutional population, except for workers' hostels. However, persons living in private dwelling units within institutions are also enumerated. For example, within a school compound, one would enumerate the schoolmaster's house and teachers' accommodation because these are private dwellings. Students living in a dormitory on the school compound would, however, be excluded.

### **Survey requirements and design**

The Quarterly Labour Force Survey (QLFS) uses the Master Sample frame that has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with the QLFS. The 2013 Master Sample is based on information collected during the 2011 Census conducted by Stats SA. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). The census EAs, together with the auxiliary information for the EAs, were used as the frame units or building blocks for the formation of primary sampling units (PSUs) for the Master Sample, since they covered the entire country and had other information that is crucial for stratification and creation of PSUs. There are 3 324 primary sampling units (PSUs) in the Master Sample, with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current Master Sample (3 324) reflects an 8,0% increase in the size of the Master Sample compared to the previous 2008 Master Sample (which had 3 080 PSUs). The larger Master Sample of PSUs was selected to improve the precision (smaller coefficients of variation, known as CVs) of the QLFS estimates.

The Master Sample is designed to be representative at the provincial level and within provinces at metro/non-metro levels. Within the metros, the sample is further distributed by geographical type. The three geography types used are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area the sample is representative of the different geography types that may exist within that metro.

It is divided equally into four subgroups or panels called rotation groups. The rotation groups are designed in such a way that each of these groups has the same distribution pattern as that which is observed in the whole sample. They are numbered from one (1) to four (4), and these numbers also correspond to the quarters of the year in which the sample will be rotated for the particular group.

The sample for the QLFS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

### **Sample rotation**

For each quarter of the QLFS, a quarter of the sampled dwellings are rotated out of the sample. These dwellings are replaced by new dwellings from the same PSU or the next PSU on the list. Thus, sampled dwellings are expected to remain in the sample for four consecutive quarters. It should be noted that the sampling unit is the dwelling, and the unit of observation is the household. Therefore, if a household moves out of a dwelling after being in the sample for two quarters (for example) and a new household moves in, the new household will be enumerated for the next two quarters. If no household moves into the sampled dwelling, the dwelling will be classified as vacant (or unoccupied).

### **Weighting**

The sample weights were constructed in order to account for the following: the original selection probabilities (design weights); adjustments for PSUs that were sub-sampled or segmented; excluded population from the sampling frame (EAs with insufficient DUs); non-response; weight trimming;

benchmarking to known population estimates from the Demographic Analysis Chief Directorate within Stats SA; and raking to bias-adjusted control estimates from a Bias Adjustment procedure to compensate for the non-coverage bias in the sample due to only observing those households that can be contacted by telephone.

### **Non-response adjustment**

In general, imputation is used for item non-response (i.e. blanks within the questionnaire) and edit failures (i.e. invalid or inconsistent responses). The eligible households in the sampled dwellings can be divided into two response categories: respondents and non-respondents. Weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.). The adjustment for total non-response was computed at two levels of non-response: PSU non-response and household non-response.

### **Calibrated survey weights**

The calibrated sample weights are constructed such that all individuals within a household are assigned the same adjusted base weight. The adjusted base weights are calibrated such that the aggregate totals will match with independently derived population estimates (from the Stats SA Demographic Analysis Chief Directorate) for various age, race and gender groups at national level and individual metropolitan and non-metropolitan area levels within the provinces. The calibrated weights are constructed using the constraint that each person within the same household should have the same calibrated weight, with a lower bound on the calibrated weights set at 50.

### **Bias Adjustment Procedure**

The non-telephone households were not enumerated during the QLFS Q2: 2020 data collection because of COVID-19. Thus, the sample consisting of telephone only households was a biased sample of the entire SA population due to differences in the characteristics of the telephone and non-telephone households, e.g. significantly higher unemployment rate for the non-telephone households as compared to the telephone households. The “Calibrated survey weights” defined in 8.4.2 would have been the final survey weights if both the telephone and non-telephone households sampled for Q2: 2020 were enumerated. Since only the telephone households were enumerated we applied bias adjustment to the Q2: 2020 calibrated weights using the Q1: 2020 QLFS data. We computed the bias adjustment factors for various labour market dimensions (i.e. status, sector, industry and occupation) and demographic (i.e. age, race and gender groups) characteristics at national level and individual metropolitan and non-metropolitan area levels within provinces. The bias adjustment factors were computed as the ratio between the estimates for each cell of the selected variables (or cross-classification of the selected variables) for the combined (telephone and non-telephone) households and telephone only households. The bias adjustment factors based on the Q1: 2020 data were then used to compute the combined telephone and non-telephone estimates from the Q2: 2020 estimates that were based on the telephone sample only. These Q2: 2020 estimates will not be consistent with the demographic population estimates because the bias adjustment factors are nonlinear statistics. Therefore, the Q2: 2020 estimates that were adjusted for the non-telephone non-coverage bias were further adjusted to achieve consistency simultaneously with the known total population aged 15 and over, and the internal consistency across all variables (or cross-classification of variables). These adjusted estimates were then used as control totals to compute the final survey weights as described in the next sub-section.

### **Final survey weights**

In the final step of constructing the sample weights, the calibrated sample weights were raked by applying the raking procedure twice with different sets of control totals at each stage of raking.

In the first application of the raking procedure, the following four control totals were used to compute the intermediate raked weights:

- Employment by Industry (13 cells)
- Employment by Occupation (13 cells)

- Sector (7 cells)
- Employment Status by Population Group (12 cells)

The intermediate raked weights computed above were further raked with the following three control totals to compute the final survey weights.

- Age by Gender (26 cells)
- Age by Population Group (52 cells)
- Age by Metro/Non-metro (51 cells)

The first application of the raking procedure uses employment status as control totals in various combinations with other variables. The second application of the raking procedure involves various combinations of population categories by age with gender, population group and metro/non-metro breakdown within the provinces. The advantage of applying the raking procedure twice would be that the population 15 and over would be consistent with the known population totals from Demographic Analysis. Moreover, the second application of raking would introduce variability in the estimates of employment/unemployment while correcting for the bias due to non-coverage of the non-telephone households.

## Estimation

The final survey weights are used to obtain the estimates for various domains of interest, e.g. number of persons employed in Agriculture in Western Cape, the number of females employed in Manufacturing, etc.

## Reliability of the survey estimates

Since estimates are based on sample data, they differ from figures that would have been obtained from complete enumeration of the population using the same instrument. Results are subject to both sampling and non-sampling errors. Non-sampling errors include biases from inaccurate reporting, processing and tabulation, etc., as well as errors from non-responses and incomplete reporting. These types of errors cannot be measured readily. However, to some extent, non-sampling errors can be minimised through the procedures used for data collection, editing, quality control, and non-response adjustment. The variances of the survey estimates are used to measure sampling errors.

### (i) Variance estimation

The most commonly used methods for estimating variances of survey estimates from complex surveys such as the QLFS are the Taylor-series Linearization, Jack-knife Replication, Balanced Repeated Replication (BRR), and Bootstrap methods (Wolter, 2007).<sup>1</sup> The Fay's BRR method has been used for variance estimation in the QLFS because of its simplicity.

### (ii) Coefficient of variation

It is more useful in many situations to assess the size of the standard error relative to the magnitude of the characteristic being measured (the standard error is defined as the square root of the variance).

The **coefficient of variation** ( $cv$ ) provides such a measure. It is the **ratio of the standard error of the survey estimate to the value of the estimate itself expressed as a percentage**. It is very useful in comparing the precision of several different survey estimates, where their sizes or scales differ from one another.

### (iii) P-value of an estimate of change

---

<sup>1</sup>Wolter, K.M. 2007. *Introduction to Variance Estimation*, 2<sup>nd</sup> Edition. New York: Springer-Verlag.

The p-value corresponding to an estimate of change is the probability of observing a value larger than the particular observed value under the hypothesis that there is no real change. If the p-value <0,01, the difference is highly significant; if p-value is between 0,01 and 0,05, the difference is significant; and if p-value >0,05, the difference is not significant.

## DATA FILE

The data file contains information on sections 1, 2, 3, 4 and 5. Each section contains the following information for each variable:

### Description of variables

**Descriptive name:** This is a short description of the variable with the variable name in brackets.

**Position of the variable:** The position of a variable within a record is recorded in the format (@xxx y.). '@xxx' indicates that the variable starts at position (i.e. column) xxx, and 'y' indicates the length of the field.

**Final code list:** The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

**Not applicable:** The code for 'missing' values is given for each variable (□ = Not applicable).

**Note to users:** Additional information for further clarity on questions.

**Unique number (UQNO)** (@1 18.)

Unique household identifier allocated to each household.

**Valid range: 160100720000007201–987105900000012801**

**Person number (PERSONNO)** (@19 2.)

Person (respondent) number

**Valid range: 01–25**

## SECTION 1

This section covers particulars of each person in the household.

### Question 1.2

**Stayed at least four nights (Q12NIGHTS)**

(@21 1.)

1.2	Has.....stayed in this household for at least four nights on average per week during the last four weeks?	
	1=Yes	<input type="checkbox"/> 1
	2=No → End of question for this person	<input type="checkbox"/> 2

#### Note to users

This question was asked for each person found in the selected dwelling. Those who were not household members (those who had not spent at least four nights per week during the last four weeks) were excluded from the data.

(2 = No). The instruction in this question was to end the interview for those who had answered 'No' to this question. It is by means of this question that household members are identified within the selected dwelling.

#### Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

#### Final code list

1 = Yes

### Question 1.3

**Gender (Q13GENDER)**

(@22 1.)

1.3	Is.....a male or a female?	
	1=MALE	<input type="checkbox"/> 1
	2=FEMALE	<input type="checkbox"/> 2

#### Note to users

This question was asked for all household members to determine their gender. Enumerators were instructed not to assume the gender of household members by just looking at persons names or physical appearances. In this instance, they had to ask the respondent the gender of each member of the household without any assumptions.

#### Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

#### Final code list

1 = Male

2 = Female

**Question 1.5****Population group (Q15POPULATION)**

(@23 1.)

<b>1.5</b>	<b>What population group does..... belong to?</b>  1=AFRICAN/BLACK 2=COLOURED 3= INDIAN/ASIAN 4= WHITE 5= OTHER, specify in the box at the bottom	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <div style="border: 1px solid black; height: 20px; width: 100%; margin-top: 5px;"></div>
------------	---	--

**Note to users**

This question was asked to determine the population group of persons from the selected dwelling units. The respondent had to answer for each member and the enumerator was not to make any assumptions. The enumerator was also instructed not to come to any conclusions, which may be influenced by his/her observation or using persons names during the interview. This question may seem very sensitive to some respondents, especially in this post-apartheid era, but it is important to find out the composition of the South African population.

**Universe**

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White

**Question 1.6****Marital status (Q16MARITALSTATUS)**

(@24 1.)

<b>1.6</b>	<b>What is ..... 's present marital status?</b>  1=MARRIED 2=LIVING TOGETHER LIKE HUSBAND AND WIFE 3= WIDOW/WIDOWER 4= DIVORCED OR SEPARATED 5= NEVER MARRIED	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5
------------	---	--

**Note to users**

This question is about the marital status of the members of the household. Both modern and traditional marriages are considered in this question.

**Universe**

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Widow/widower
- 4 = Divorced or separated
- 5 = Never married

**Question 1.7**

**Highest education level (Q17EDUCATION)**

(@25 2.)

<b>1.7</b>	<p><b>What is the highest level of education that... has successfully completed?</b></p> <p>98 = NO SCHOOLING</p> <p>00 = GRADE R/0</p> <p>01 = GRADE 1/SUB A/CLASS 1</p> <p>02 = GRADE 2/SUB B/CLASS 2</p> <p>03 = GRADE 3/STANDARD 1/AET 1 (KHARI RI GUDE, SANLI)</p> <p>04 = GRADE 4/STANDARD 2</p> <p>05 = GRADE 5/STANDARD 3/AET 2</p> <p>06 = GRADE 6/STANDARD 4</p> <p>07 = GRADE 7/STANDARD 5/AET 3</p> <p>08 = GRADE 8/STANDARD 6/FORM 1</p> <p>09 = GRADE 9/STANDARD 7/FORM 2/AET 4</p> <p>10 = GRADE 10/STANDARD 8/FORM 3</p> <p>11 = GRADE 11/STANDARD 9/FORM 4</p> <p>12 = GRADE 12/STANDARD 10/FORM 5/MATRIC (NO EXEMPTION)</p> <p>13 = GRADE 12/STANDARD 10/FORM 5/MATRIC (EXEMPTION/ BACHELOR'S PASS)</p> <p><b>If code 98 or 00-13, Go to Q1.9</b></p> <p>14 = NTC 1/N1/NC (v)LEVE L2</p> <p>15 = NTC 2/N2/NC (v)LEVEL 3</p> <p>16 = NTC 3/N3/NC(v)LEVEL 4</p> <p>17 = N4/NTC 4</p> <p>18 = N5/NTC 5</p> <p>19 = N6/NTC 6</p> <p>20 = CERTIFICATE WITH LESS THAN GRADE 12/STD 10</p> <p>21 = DIPLOMA WITH LESS THAN GRADE 12/STD 10</p> <p>22 = CERTIFICATE WITH GRADE 12/STD 10</p> <p>23 = DIPLOMA WITH GRADE 12/STD 10</p> <p>24 = HIGHER DIPLOMA</p> <p>25 = POST HIGHER DIPLOMA (MASTERS, DOCTORAL DIPLOMA)</p> <p>26 = BACHELORS DEGREE</p> <p>27 = BACHELORS DEGREE AND POST GRADUATE DIPLOMA</p> <p>28 = HONOURS DEGREE</p> <p>29 = HIGHER DEGREE (MASTERS/PHD)</p> <p>30 = OTHER, <i>specify in the box at the bottom</i></p> <p>31 = DON T KNOW</p> <p><b>If code 14-29, Go to Q1.8</b></p> <p><b>If code 30-31, Go to Q1.9</b></p> <p> <b>Diploma or certificate should have been at least six months study duration full time (or equivalent)</b></p> <p> <b>Write the appropriate code in the boxes</b></p>	<div style="border: 1px solid black; height: 100px; width: 100%;"></div>
------------	---	--

**Note to users**

Enumerators were instructed that it was only those qualifications already obtained that had to be entered. That means the current level of study with which a person was still busy with was not applicable. It was very important to complete each record even if the person had not attended school. Enumerators were instructed to record diplomas and certificates that were of at least six months' duration. If the answer to Question 1.7 is code 98 or 00–12 or 29–30, the instruction is to go to Question 1.9. If code 13–28 is selected, the instruction is to go to Question 1.8.

**Universe**

------------	--	--

**Note to users**

The question focuses on attendance of educational institutions. 'Educational institution' can include school, university of technology, university, home school, pre-school, crèche, day care, distance/ correspondence education, etc. If the respondent is attending an educational institution, the survey officer has to proceed to Question 1.10. If the individual is not attending an educational institution, the enumerator should skip to Section 2.

## SECTION 2

This section covers economic activities in the last week for persons aged 15 years and older.

### Question 2.0

*Person himself/herself responding (Q20SELFRESPOND)*

(@32 1.)

<b>2.0</b>	<b>Interviewer to answer</b> <b>Is the person him/herself responding to questions?</b>	
1=Yes	→ Go to Q 2.2	<input type="checkbox"/> 1
2=No		<input type="checkbox"/> 2

### Note to users

This question was answered by the enumerator. It was recommended that if all the members of the household who qualified for this section were present, they should answer for themselves. It is by means of this question that the accuracy of the information received can be qualified, as it would reflect whether persons answered for themselves or a proxy responded on their behalf.

### Universe

All members of the households in selected dwelling units aged 15 years and older.

### Final code list

1 = Yes

2 = No

☐ = Not applicable

**Note:** Questions 2.1–2.3 are not included in the data, as these questions were asked for administrative purposes and as such do not have any impact on the analysis of the data.

## Question 2.4

2.4	In the last week (Monday to Sunday)....	YES	NO
	<b>(a) Did you work for a wage, salary, commission or any payment in kind (including paid domestic work), even if it was for only one hour?</b>  <i>Examples: a regular job, contract, casual or piece work for pay, work in exchange for food or housing, paid domestic work.</i>	<input type="checkbox"/> 1	<input type="checkbox"/> 2
	<b>(b) Did you run or do any kind of business, big or small, for yourself or with one or more partners, even if it was for only one hour?</b>  <i>Examples: Commercial farming, selling things, making things for sale, construction, repairing things, guarding cars, brewing beer, collecting wood or water for sale, hairdressing, or the businesses, taxi or other transport business, having a legal or medical practice, performing in public, having a public phone shop, etc.</i>	<input type="checkbox"/> 1	<input type="checkbox"/> 2
	<b>(c) Did you help without being paid in any kind of business run by your household, even if it was for only one hour?</b>  <i>Examples: Commercial farming, help to sell things, make things for sale or exchange, doing the accounts, cleaning up for the business, etc.</i>	<input type="checkbox"/> 1	<input type="checkbox"/> 2
	<b>If yes to any part of Q 2.4 go to Section 4, otherwise go to Q 2.5</b>		

## Note to users

This question is applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the last seven days. In order to be certain that the categories had been answered, there should be either a 'Yes' or 'No' answer to all of them. Most importantly, if there was a 'Yes' to any part of this question, there should be a skip to Section 4. If all the categories were 'No', there should be a continuation to the next question.

## Paid work (Q24APDWRK)

	14 = OTHER REASON, SPECIFY	14
	<input type="text"/>	

### Note to users

This question was aimed at establishing the reasons why persons were absent from their normal activities in the seven days prior to the interview. If more than one reason was given, only the main one was recorded. A provision was made to specify the reasons that were not on the pre-coded list. If options 01, 02 or 04 were selected, the enumerator should go to Section 4. If option 13 was selected, the enumerator should go to Question 3.1; for all other reasons the enumerator should proceed to Question 2.7a.

### Universe

(e2)	If yes, for how many hours?	<input type="checkbox"/>	<input type="checkbox"/>

### Note to users

This question was applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the last seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the seven days. In order to be certain that the categories had been answered, there should be either a 'Yes' or 'No' answer to all of them. If 'Yes' to any of these questions, the number of hours spent on the activity had to be indicated as well.

		<b>Month of birth:</b> Example of month 0 3	<input type="text"/> <input type="text"/>
		<b>Year of birth:</b> Example of year 1 9 8 3	<input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>
	Age (less than 1 year = 000)		<input type="text"/> <input type="text"/> <input type="text"/>

**Derived variable**

This is a derived variable indicating the age of the household member. The age of the household member was derived from Question 1.4 of the questionnaire.

This question was asked for each member of the household. The instruction was to write the age in completed years to the nearest whole numbers and not in words. Thus, if a person was aged two years and six months, the instruction was to write the two completed years. For children aged less than a year, the instruction was to write 000.

**Universe**

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.
