How the elephant got its trunk

In times long ago, elephants had short noses. One day Bubu, the baby elephant, went for a walk through the forest. He always wanted to know things, so he asked lots of questions.

He walked to the bank of a river. He had never seen a crocodile before. "Hello, Mr Crocodile. What do you like to eat?" Bubu asked politely.

The crocodile grabbed the little elephant by his nose and pulled hard. But Bubu fought back by spreading out his legs and pulling back. At each pull his nose grew longer and longer. At last the crocodile let go of the nose and swam away.

Instead of his short nose, Bubu now had a long trunk! He could do all kinds of new things with it!
